1. Overall Description:

SA5 thanks SA1 for the draft report of the Priority Service Feasibility Study (draft TR 22.950 v1.0.0).

SA5 notes that Priority Service is intended to be utilised for both Voice and Data and therefore both elements are considered within the scope of the document. It is further noted that while Priority Service is meant for both Voice and Data services, the initial set of requirements address Circuit Switched Services (Voice as well as Data).

SA5 believes that the Call Detail Record (now **Charging Data Record)** requirements specified in the draft TR could be handled with CRs making modifications to SA5's TS 32.205. However, since some requirements were indicated as "for further study" and because it is a draft TR, SA5 will wait for firm requirements before providing a more thorough analysis.
