1. Overall Description:

T3 has carried out the work of specifying the ISIM, based on requirements found in the following specifications:

S3 - TS 33.203
N1 - TS 23.218
 TS 24.228
 TS 24.229
S1 - TS 22.228
 TS 22.101
S2 - TS 23.228

In the light of ISIM being only recently defined, these specifications still mention USIM, UICC or ISIM, but refer in T3's understanding to ISIM.

After SA#15, T3 has the following understanding of the ISIM (IM Services Identity Module). It contains IMPI, IMPU, Home domain, Ciphering and Integrity key.

2. Actions:

To S1, S2, S3, N1: T3 asks S1, S2, S3, N1 to review and align the terminology in their specifications according to the use of ISIM.

3. Date of Next T3 Meetings:

Title	Date	Location	Country
T3 #24	20-23 August 2002	Seattle	USA
