1. Overall Description:

T3 apologise for their late response to the referenced LS from SA5. T3 note that this LS was received midway through their January plenary meeting and there was insufficient time during that meeting to review TR 32.802 and respond by the requested February deadline. As subsequent T3 plenaries occurred well after this deadline, the response to SA5's original LS became a lower priority matter and was postponed.

Although the deadline for incorporating comments into the UEM Feasibility Study has long passed, T3 have reviewed the latest version of the document (TR 32.802 v5.0.0) and we are pleased to see that the scope of UEM includes both the USIM and ME domains. T3 concur that UE Configuration Query, Reconfiguration, Software Update, and Diagnostics are useful features for standardisation, and we acknowledge that management of the UICC will be an important element of UEM functionality.

T3 look forward to working with SA5, T2, and SA3 in furthering the Release 6 definition of the UEM functionality which is described in the UEM Feasibility Study.

2. Actions:

To SA5 group.

ACTION: Accept T3's humble apologies for their less-than-prompt response to SA5's LS.

3. Date of Next T3 Meetings:

T3 Meeting #25	5-8 November 2002	Maastricht, Netherlands
T3 Meeting #26	11-14 February 2003	TBD
