Work Item Description

Title

Lawful Interception in the 3GPP Rel-6 architecture

1 3GPP Work Area

	Radio Access
X	Core Network
	Services

2 Linked work items

3GPPRel-6 architecture and services

3 Justification

The 3GPP Rel-6 architecture continues to develop IP-based Services, which need to be addressed by lawful interception. SA WG3-LI will study IMS phase 2, Multimedia Broadcast and Multicast Services, Priority Service, Subscriber Certificates, and WLAN for possible lawful interception systems. For circuit switch, AMR-WB will be investigated.

4 Objective

The objective of this work item is to create a lawful interception specification for the latest Rel-6 architecture and services as described in the above justification.

The enhancements to specification TS 33.108 addresses the additional work to specify the HI2 (Intercepted Related Information) and the HI3 (Content) interfaces for Packet Data, Circuit Switched and IMS delivery to the Law Enforcement Monitoring Facilities for 3G networks for Release 6. In the first step the 3G Packet Domain and phase 1 Multi Media Domain have been addressed in this specification for Rel 5. The Circuit-Switched Domain was already addressed by different regional specifications for 2G networks, and for 3G networks the Circuit-Switched Domain will be based on these documents and incorporated into Rel 6. HI1 (Administration) is not covered in this specification and is considered to be a matter of national regulation.

5 Service Aspects

None

6 MMI-Aspects

None

7 Charging Aspects

None

8 Security Aspects

Enhanced Lawful Interception specifications

9 Impacts

Affects:	USIM	ME	AN	CN	Others

10 Expected Output and Time scale (to be updated at each plenary)

Affected existing specifications				
Spec No.	CR	Subject	Approved at plenary#	Comments
33.106 v 5.1.0		Lawful Interception Requirements	TSG SA#11	Requirements to be included in Rel-6 update
33.107 v 5.4.0		Lawful Interception Architecture and Functions	TSG SA#11	Architecture to be included in Rel-6 update
33.108 v.5.1.0		Handover Interface for Lawful Interception	TSG SA #16	Update handover interface for IMS phase 2

11 Work item rapporteurs

Berthold Wilhelm, Ron Ryan

12 Work item leadership

3GPP SA3

13 Supporting Companies

Siemens
Nokia
Motorola
Nortel Networks
Ericsson
Vodafone
T-Mobile Deutschland
