1. Introduction

SA1 has studied LS (S3-030654) from SA3. SA1 concluded that there are no specific requirements for password based authentication for presence service. Further SA1 has no detailed requirements for IMS or non-IMS watchers. Similar level of security should however be required from a non-IMS watcher than from an IMS watcher.

SA1 believes that SA3 with support from SA2 and CN1 can find a technical solution that provides sufficient level of security for presence service.

2. Actions

None.

3. SA1 future meetings

SA1#23 12 -16 January 2004 Innsbruck
