E-mail Address: Nigel.Barnes@motorola.com

1. Overall Description:

SA1 thank SA3 for their LS (S1-031202 (S3-030639)) and T3 for their LS (S1-031102 (T3-030623)).

SA1 would like to confirm to both addressed groups that after some discussion, all three services (SoLSA, ASCI and NIA) are required to be supported on the USIM, and therefore ask T3 to implement the draft CRs as indicated in S1-031102 (T3-030623).

2. Actions

T3 is asked to implement the CRs as were attached to the LS in Tdoc S1-031102 (T3-030623).

SA3 is asked to continue their work developing key management for ASCI/VGCS.

3. Date of Next SA1 Meeting:

TSG SA1#23: 12-16 January 2004, Austria.
