3GPP TSG-SA3 LI Meeting #16   **S3LI05_024r2**
Barcelona, Spain, 18 – 20 January 2005

Title:	Reply to LS on Need for the IMSI at the PDG
Release:	Rel-6
Work Item:	WLAN Interworking

Source:	SA3 LI
To:	SA3, CN4
Cc:	SA2

Contact Person:
  Name: Brye Bonner
  Tel. Number: 847.576.5920
  E-mail Address: brye.bonner@motorola.com

Attachments: None.

SA3 LI thanks SA3 and CN4 for their liaisons S3-041046 and N4-041590, respectively on Need for the IMSI at the PDG.

SA3-LI would like to provide the following answers to the questions raised by CN4.

Q1: Is intercept at PDG implied in Release 6?

A1: SA3-LI has specified the PDG as an Intercepting Control Element in TS 33.107 "Lawful Interception Architecture and Functions" for rel-6.

Q2: If yes, is intercept based on IMSI mandatory, or it is enough to store the MSISDN, or is there no requirement for intercept at all in Release 6?

A2: SA3-LI understand that the MSISDN should be available at the PDG. However, SA3-LI are unsure for a PS only domain subscriber (they don't have a CS domain MSISDN publicly available), whether an MSISDN would actually be available in such cases. If CN4 can confirm that an MSISDN will be available then SA3-LI do not require the IMSI to be provided at the PDG. If the MSISDN will in fact not be available under the mentioned scenario then SA3-LI would require the IMSI to be available at the PDG or the availability of another id such as a publicly available NAI.

    Actions:

CN4 – Confirm whether the MSISDN is available at the PDG in case of a PS domain only subscriber.

 Date of Next TSG-SA3-LI Meeting:

SA3-LI#17   5-7 April 2005   Sophia Antipolis, France
