Request for ISMA 1.0 Encryption and Authentication Draft (TN0106)

1   Acceptance

The ISMA is pleased to provide, in time for your next meeting in September, its current ISMA 1.0 Encryption and Authentication document to 3GPP for its work on file download. We would ask to the extent possible that you limit distribution only to those in the 3GPP membership who will use it as part of 3GPP's Content Protection work.

2   Status of other ISMA work

The ISMA is conducting 2 separate studies related to Advanced Content and CODECS. We would be pleased to provide access to this work and would welcome your contributions to this important work for the future.

3   Upcoming ISMA Events

The next interop and ISMA Forum will be held from 8-11 September in Rennes, France hosted by France Telecom. We would welcome any 3GPP member who wished to attend either or both events. A complete calendar of ISMA events is available on our web site at: http://www.isma.tv.

4   Delegates:

The following continue as the ISMA's delegates to 3GPP and can provide the documents to you as they become available.

Technical – David Singer (Apple Computer), Jan van der Meer (Philips)
