

Source: TSG SA
Title: Liaison to TSG-CN, RAN, T
Subject: Approval of Baseline Specifications
Document for: Information
Agenda Item:
Date: 2 March 1999

TSG SA wishes to notify the 3GPP TSGs that they have today accepted a number of inputs from ETSI/SMG as Baseline Specifications and Reports of Service Definitions for UMTS. These are in the 22.xx range and are all at version 3. These documents are thus approved by TSG SA and placed under change control.

These are to be found in tdoc sp-99014 on the CD-ROM of TSG#2.

Four change requests (three to 22.00 and one to 22.05) were also approved and will in due course be implemented in these specifications, but until then the CRs may be found in tdoc sp-99015, also on the CD-ROM.

TSGs are invited to note these documents and to treat them as the basis for their service requirements.

TSG-SA also noted for information TS 22.29 in tdoc sp-99079 on handover requirements.
