**3GPP TSG T WG1/EMC #1**  
**Paris, France**  
**13-15 April 1999**

**Tdoc TSG T1E-99010**

**Source WG T1 Sub WG EMC**

**Title : Liaison Statement to CISPR**

**Agenda Item : 10.2**

**Document for : Discussion and information**

**Attached is a Liaison Statement generated by T1/EMC for sending to CISPR. It is being distributed in TSG-T for information. T1/EMC will send to CISPR after obtaining PCG approval.**

The 3GPP work on defining standards for the 3G third generation cellular system requires the production of EMC Standards. As CISPR is working on the development of EMC measurement methods and limits for frequencies above 1 GHz, the 3GPP TSG T1 group would appreciate any input that can be made, while recognizing that CISPR may not yet have finalized documents.
