

TSG-T #4 TP-99130

# Status Report T3

Dr. Klaus Vedder  
Chairman T3

TSG-T #4  
Miami, 17-18 June 1999

# Meetings

- Editing meeting
  - 27 - 28 May 1999, Copenhagen, hosted by Nokia
  - 31.101 *UICC physical and logical characteristics*
  - 31.102 *USIM characteristics*
  
- TSG-T3 #5
  - 31 May - 02 June 1999, Åland, hosted by Nokia
  - 37 delegates, 11 countries
  - co-located and joint session with SMG9 #18
  
- TSG-T3 #6
  - 14 - 16 June 1999, Miami, hosted by Nokia Inc. et al
  - 19 delegates, 10 countries

# Status of Deliverables

- 3G TS 21.111 *USIM and IC Card Requirements*
  - no changes to current version 3.0.0
- 31.101 *UICC physical and logical characteristics*  
31.102 *USIM characteristics*
  - significant progress on both deliverables
  - current versions: 0.5.0
  - versions 0.6.0 will be available in two weeks
  - both documents will be presented to TSG-T #5 for information

# Major Open Issues

- Phonebook

- more complex than GSM abbreviated dialling numbers
  - ⇒ e.g., second names, fax numbers imply linked records
- three different proposals currently under evaluation
- decision to be taken at the coming T3 meeting

- Application Identifiers (AIDs)

- USIM application(s) require identifiers on the UICC
- three scenarios for management outlined in TP-99131
- preferred T3 solution requires a new specification

*T3 is asked to discuss and endorse T3's position and take appropriate action*

# Other Issues

- Rapporteur for 31.102 *USIM characteristics*
  - T3 accepted with much regret the resignation of Y. Honda (Nippon Ericsson) and thanked him for his valued contributions
  - T3 appointed M. Kobayashi (Nippon Ericsson) and Ch. Heim (Giesecke & Devrient) as joint rapporteurs
- Liaison Statements to other groups
  - to SA1 (T3-99154)
    - ⇒ multiple USIM in a UICC
  - to SA1, SA2, T2 (T3-99158)
    - ⇒ implications of GSM-UTRAN handover (parameters and identities)
  - to CN1, SA2 (T3-99159)
    - ⇒ network related parameters to be stored in the USIM
  - to SA1, SA3 (T3-99180)
    - ⇒ clarification of requirements for USIM-Terminal lock

# Transfer of GSM Specifications

- **GSM 11.14 *SIM Application Toolkit***
  - seen of major importance for development of operator specific services
  - two major problems were identified
    - ⇒ use of toolkit applications on UICCs with more than one USIM
    - ⇒ restructuring of document (resource problem)
- **GSM 11.17 *SIM Conformance Test Specification***
  - optional GSM Phase 2+ specification
    - ⇒ need to be rewritten due to (some) different requirements
  - considered of secondary importance w.r.t. testing
    - ⇒ *urgent requirement for “transforming” section 27 of GSM 11.10 into a test specification for the UICC-Terminal interface*
  - T3 has currently no resources to do either task

# Meeting Calendar

- TSG-T3 #7
  - 05 - 07 July 1999, Lund, hosted by Ericsson
- Editing meeting
  - 24 - 26 August 1999, Bonn, hosted by T-Mobil
    - ⇒ 31.101 *UICC physical and logical characteristics*
    - ⇒ 31.102 *USIM characteristics*
  - 24 August 1999 joint session with SA3 (tbc)
- TSG-T3 #8
  - 04 - 06 October 1999, Korea, hosted by Samsung et al.
- TSG-T3 #9
  - 02 - 04 November, Austin, hosted by Schlumberger
