TSG-CN WG4 (CN4) would like to thank TSG-SA WG4 (SA4) for their LS (N4-010218 / S4-01022) on default configurations for handover from GSM to UMTS.

CN4 understands the requirement for this addition of this new UMTS\_AMR2 codec type and is in support of the proposal in principle. However, CN4 would like to understand if this requires the addition of a new Codec Type ID, i.e. in the codec list 26.103 and support in TFO enabled Transcoders in the core network equipment, when generating TFO\_REQ, TFO\_REQ\_L and similar messages mentioned in TS 28.062.
