

Title: Potential list of issues for IETF co-ordination

Source: TSG-T Vice Chairman (Kevin Holley)

During this week there will be a TSG-Leaders IETF co-ordination meeting, where the TSG leaders will discuss with the IETF co-ordinator the issues between TSGs and the IETF.

As an input to that meeting it would be helpful if TSG-T could agree an initial set of issues from the TSG-T perspective. The following is provided as a starting point for the discussion:

- **Testing IP-based applications**
- **Interaction between MExE applications and SIP call control?**
- **Synchronisation standards running over IP?**
- **AT commands controlling IP sessions**
- **Alternatives to AT commands**
- **Multimedia Messaging, SMS, Instant Messaging, Presence, Push**
- **IP platforms for UICC?**
