

CR-Form-v7

CHANGE REQUEST

34.121 CR CRNum # rev **-** # Current version: **3.9.0**

For **HELP** on using this form, see bottom of this page or look at the pop-up text over the # symbols.

Proposed change affects: UICC apps# ME Radio Access Network Core Network

Title:	#	Correction of regional note in Annex J.1	
Source:	#	Association of Radio Industries and Businesses	
Work item code:	#		Date: # 04/09/2002
Category:	#	F	Release: # R99
		Use <u>one</u> of the following categories:	Use <u>one</u> of the following releases:
		F (correction)	2 (GSM Phase 2)
		A (corresponds to a correction in an earlier release)	R96 (Release 1996)
		B (addition of feature),	R97 (Release 1997)
		C (functional modification of feature)	R98 (Release 1998)
		D (editorial modification)	R99 (Release 1999)
		Detailed explanations of the above categories can be found in 3GPP TR 21.900.	Rel-4 (Release 4)
			Rel-5 (Release 5)
			Rel-6 (Release 6)

Reason for change:	#	Latest Japanese regulation incorporated test tolerances, which have already been specified in TS34.121. Therefore Annex J.1 has to be corrected.	
Summary of change:	#	Following test sections are deleted from Annex J.1 5.2, 5.3, 5.4.1, 5.4.2, 5.5.1, 5.13.2, 6.2, 6.4, 6.7 Section number for Spectrum Emission Mask test is changed from 5.10 to 5.9.	
Consequences if not approved:	#	Regulatory situation will be wrongly stated in Annex J.1.	

Clauses affected:	#	J.1									
Other specs affected:	#	<table border="1" style="display: inline-table; vertical-align: middle;"> <tr> <td style="width: 20px; text-align: center;">Y</td> <td style="width: 20px; text-align: center;">N</td> </tr> <tr> <td style="text-align: center;">#</td> <td style="text-align: center;">X</td> </tr> <tr> <td style="text-align: center;">#</td> <td style="text-align: center;">X</td> </tr> <tr> <td style="text-align: center;">#</td> <td style="text-align: center;">X</td> </tr> </table> Other core specifications # Test specifications # O&M Specifications #	Y	N	#	X	#	X	#	X

How to create CRs using this form:

Comprehensive information and tips about how to create CRs can be found at <http://www.3gpp.org/specs/CR.htm>. Below is a brief summary:

- 1) Fill out the above form. The symbols above marked # contain pop-up help information about the field that they are closest to.
- 2) Obtain the latest version for the release of the specification to which the change is proposed. Use the MS Word "revision marks" feature (also known as "track changes") when making the changes. All 3GPP specifications can be

downloaded from the 3GPP server under <ftp://ftp.3gpp.org/specs/> For the latest version, look for the directory name with the latest date e.g. 2001-03 contains the specifications resulting from the March 2001 TSG meetings.

- 3) With "track changes" disabled, paste the entire CR form (use CTRL-A to select it) into the specification just in front of the clause containing the first piece of changed text. Delete those parts of the specification which are not relevant to the change request.

Annex J (informative): Information about special regional application of test cases and requirements

This annex provides information about special regional application of the tests specified in the core part of the present document. The special regional application of certain test cases is typically caused by specific local regulation and legalisation.

J.1 Japan

For regulatory testing in Japan shared risk against core specification value with test tolerance of zero may be applied provisionally, until the time the non-zero test tolerances principle used in the present document is reflected in Japanese regulations, The shared risk principle described above will apply to the following requirements:

- ~~— 5.2 Maximum output power;~~
- ~~— 5.3 Frequency error;~~
- ~~— 5.4.1 Open Loop Power Control in the Uplink;~~
- ~~— 5.4.2 Inner Loop Power Control in the uplink;~~
- ~~— 5.5.1 Transmit off power;~~
- 5.9.4 Spectrum Emission Mask;
- ~~— 5.13.2 Peak code domain error;~~
- ~~— 6.2 Receiver Sensitivity Level;~~
- ~~— 6.4 Adjacent Channel Selectivity;~~
- ~~— 6.7 Intermodulation Characteristics.~~

NOTE: This information should be reviewed on a regular basis to check its applicability, as changes to regulation allowing usage of the non-zero test tolerances principle are expected.
