

Presentation of Specification/Report to TSG-T

Presentation to: TSG-T Meeting #17
Document for presentation: TR 22.857 Run-Time Independent Framework Feasibility Study; Version 1.0.0
Presented for: Information

Abstract of document:

This document discusses the need for a Runtime Independent Framework for MExE, what it is, and how it can be provided with a minimum of changes to the existing specification. It consists of a benefits analysis and a feasibility study on the creation of a framework enabling the application of MExE to arbitrary runtime environments.

Changes since last presentation:

New technical report.

Outstanding Issues:

Binding executables to certificates and metadata, Root key certificate packaging and metadata, Handling of classmarks.

Contentious Issues:

Yes

Debate ongoing in T2

3GPP TR 22.857 V1.0.0
