TSG GERAN thanks TSG T and TSG T3 for the information in TDoc TP-020259 and T3-020913 regarding the upgrading of 11.10-4 'SIM Application Toolkit Test Specification' to release 99.

Thanks to the presence of a TSG T3 delegate at the GERAN WG5 meeting #12 good progress was made on the SIM Application Toolkit Test Specification and a first version of 11.10-4 Release 99 was approved. 11.10-4 Release 99 covers testing of all mobiles up to and including R99. At the next GERAN meeting Gemplus will present CRs to close the existing R96 11.10-4 and replace it with a pointer to 11.10-4 Release 99. The releases 97 and 98 will also be created with the only content of a pointer to Release 99.

The TSG GERAN WG5 meeting discussed ways forward to make most of the SIM Toolkit Application Test Specification network independent. This discussion will continue together with the TSG T3 representative and will be presented at the next GERAN meeting.

The Terminal Profile information in 51.010-2 must be updated and it will then be moved to 11.10-4. After this 11.10-4 will not be dependant of 51.010-2 any more.

GERAN WG5 will be happy to work together with SIM toolkit expertise from T3 in order to solve the remaining issues. When they are solved the ownership of 11.10-4 can be discussed.

Action

TSG T3:

- To produce CRs for the closing of previous releases.
- To move the terminal profile information from 51.010-2 to 11.10-4.
- To propose how to specify the interaction between the SIM toolkit and the network.

Date of Next TSG GERAN Meetings:

TSG-GERAN Meeting #13 3 - 7 February 2003
TSG GERAN Meeting #14 7 - 11 April 2003

San Antonio, Texas, USA
TBD, Europe
