

Work Item Description

Title

Test specification for (U)SIM API for Java Card™

1 3GPP Work Area

	Radio Access
	Core Network
X	Services

2 Linked work items

None

3 Justification

A test specification for the 3GPP TS 31.130 REL-6 “(U)SIM API for Java Card™” would validate implementation of the (U)SIM API on a UICC platform.
It would be based and extend the testing of “UICC API for Java Card™” (ETSI TS 102 241).

4 Objective

The Test specification will consist of the following items:

- Test specification document describing each single test case
- Java Card™ Test applets implementing the test cases
- Loading scripts for the Test applet’s
- Test script

5 Service Aspects

None

6 MMI-Aspects

None

7 Charging Aspects

None

8 Security Aspects

None
