CC: Friedhelm Rodermund, Secretary 3GPP TSG T WG 2.  
Date: 102 May 2001  
Subject: **Nomination of Mark Cataldo as candidate for TSG T  
WG T2 MEXE SWG Chairman**

---

Dear Kevin

As an indication of Motorola's continuing commitment to 3GPP, Motorola is pleased to nominate Mark Cataldo as candidate for the T2 MEXE SWG Chairman position.

Mark has for many years been actively participating in standardization work, notably in ETSI SMG4 and SMG1. Since the creation of 3GPP Mark has continued his activities, especially within T2 and S1 Working Groups. Mark is currently the serving T2 MEXE SWG Chairman and rapporteur for the MEXE specifications.

Motorola Ltd (UK) will of course provide all necessary support for him to discharge his duties and responsibilities as T2 MEXE SWG Chairman.

Best Regards,

Ian

**Subject:** Candidacy for T2 SWG1 chair

Hello,

I formally announce my candidacy for the T2 SWG1 chair.

I have been involved in MExE from its earliest days when the Feasibility Study was undertaken in late 1997, and have attended every SMG4 and TSG-T2 MExE meeting that has taken place since 1998. I am currently the rapporteur for the MExE specification (23.057), and have been chair of the MExE group since January 1999. I am also the rapporteur of the MExE Stage 1 specification (22.057), and chair TSG-SA1 MExE meetings when they have been called.

My principle activities within 3GPP involve the support of telephony services, multimedia services, the internet and client/server models, and these interests and activities interact well with my role as MExE chairman. Within TSG-SA1 I support services activity in the VHE, OSA, IMS and (the new) Presence Service meetings, bringing continuity and terminal focus on 3G mobile services.

As chair, I intend to continue my past strong support and promotion of the MExE standard, enabling exciting new developments and multimedia services to become part of the everyday mobile experience.

I also enclose an official letter of support from Motorola.

Regards,  
Mark.

---

Mark Cataldo,

M
