Nomination of Dr. Yunjung Yi as candidate for 3GPP RAN WG1 Vice Chair

Dear Susanna and Patrick,

LG Electronics is pleased to nominate Dr. Yunjung Yi as candidate of 3GPP RAN WG1 Vice Chair election.

Yunjung received the Ph.D degree in computer science from University of California, Los Angeles, in 2004. Before joining LG, she worked with Honeywell aerospace research labs for more than 7 years, where she as technical lead demonstrated her outstanding leadership in coordinating multiple teams to deliver successful outcomes for many government-funded projects.

Since joining LG Electronics, she has been making substantial contributions to wireless technology development and standardization efforts in IEEE802.11, Wi-Fi Alliance, and 3GPP. In the most recent years, she has been focusing on LTE-Advanced technologies in carrier aggregation, small cell enhancements, new carrier type and interworking with Wi-Fi.

She has 15 years of research and development experiences in deep space communications, wireless sensor networks, CDMA multi-user detection, network synchronization, and cellular and Wi-Fi standards. We believe her broad experiences in wireless communication industries will be an asset to a successful 3GPP RAN1 leadership team. More importantly, her balanced leadership skills and kind personality will ensure productive and pleasant 3GPP RAN1 WG ad hoc sessions.

LG Electronics is committed to support her in every aspect necessary for her to accomplish the duties and responsibilities of RAN1 Vice Chair.

Sincerely,

Go-Hee Choi
Vice President
Head of Advanced Communication Technology R&D Lab
LG Electronics
