Re: Nomination for 3GPP Technical Specification Group (TSG) SA Vice Chairman

On behalf of T-Mobile USA Inc. (ATIS), please accept the nomination of Mark L Younge. P.E. for the leadership position of Vice Chairman of the 3GPP TSG SA. Mr. Younge has over 40 years' experience in the Telecommunications field and 30 years in standardisation development. Mark has served in the leadership of ATIS, GSMA/NA, OMA, and 3GPP as well as numerous other industry fora in past years.

Mr. Younge is a Senior Member of Technical Staff at T-Mobile USA (TMUS) and has represented TMUS in 3GPP TSG SA since 2018 and in SA WG1 since 1999 serving multiple terms as its Vice Chairman. He also serves as Chairman of ATIS WTSC and is a member of the ATIS delegation to the 3GPP Program Coordination Group (PCG). Mark also administers the North American Friends of 3GPP (NAF3) hosting group. Finally, Mark has chaired the Open Mobile Alliance (OMA) Location Working Group (LOC) since 2010 and served as Treasurer and Vice Chairman of the OMA Board of Directors.

T-Mobile USA believes that Mr. Younge's experience in the standardisation of the GSM family of technologies, his leadership in those standardisation efforts and his long participation in 3GPP give him the necessary tools to continue to effectively carry out the duties of this leadership position in the 3GPP. In addition, Mark will be trained to comply with all applicable antitrust/competition laws and regulations while acting in his capacity as TSG SA Vice Chairman. If elected to Vice Chairman of TSG SA, T-Mobile US will provide the necessary resources and support for Mr. Younge to accomplish the duties and responsibilities of that office.

With best regards,

A handwritten signature in black ink that reads "Scott F. Migaldi".

Mark Younge – CV

Mark Younge has worked in the telecom industry for 33 years, the last 23 years in standards, and the last 21 of that in wireless. Prior to his current position of 14 years as Staff Engineer (MTS) with T-Mobile USA, Mark has had a broad range of experience including test boardman, field engineer, staff engineer, engineering manager, director of standards and certification, independent consultant, and a marketing product manager. Over the years Mark has actively participated in and has led groups in the TIA, ATIS, GSMA/NA, OMA, and 3GPP as well as numerous other industry fora. Currently he is Chairman of ATIS WTSC, is a member of the ATIS delegation to the 3GPP Program Coordination Group (PCG) and administers the North American Friends of 3GPP hosting group. In addition, Mark chairs the Open Mobile Alliance (OMA) Location Working Group (LOC) which has recently completed the LTE Positioning Protocol enhancements (LPPE) enabler and is about to complete the Secure User Plane (SUPL) version 3 enabler.
