

Next Generation Wireless: Business Drivers for an All-IP network

*Willem Koelewijn
Director of Marketing Strategy, Lucent GSM/UMTS
3GPP Workshop
Nice, February 7-9, 2000*

Today's topics

- **Key Trends in Mobile**
- Requirement for next generation wireless network

Growth

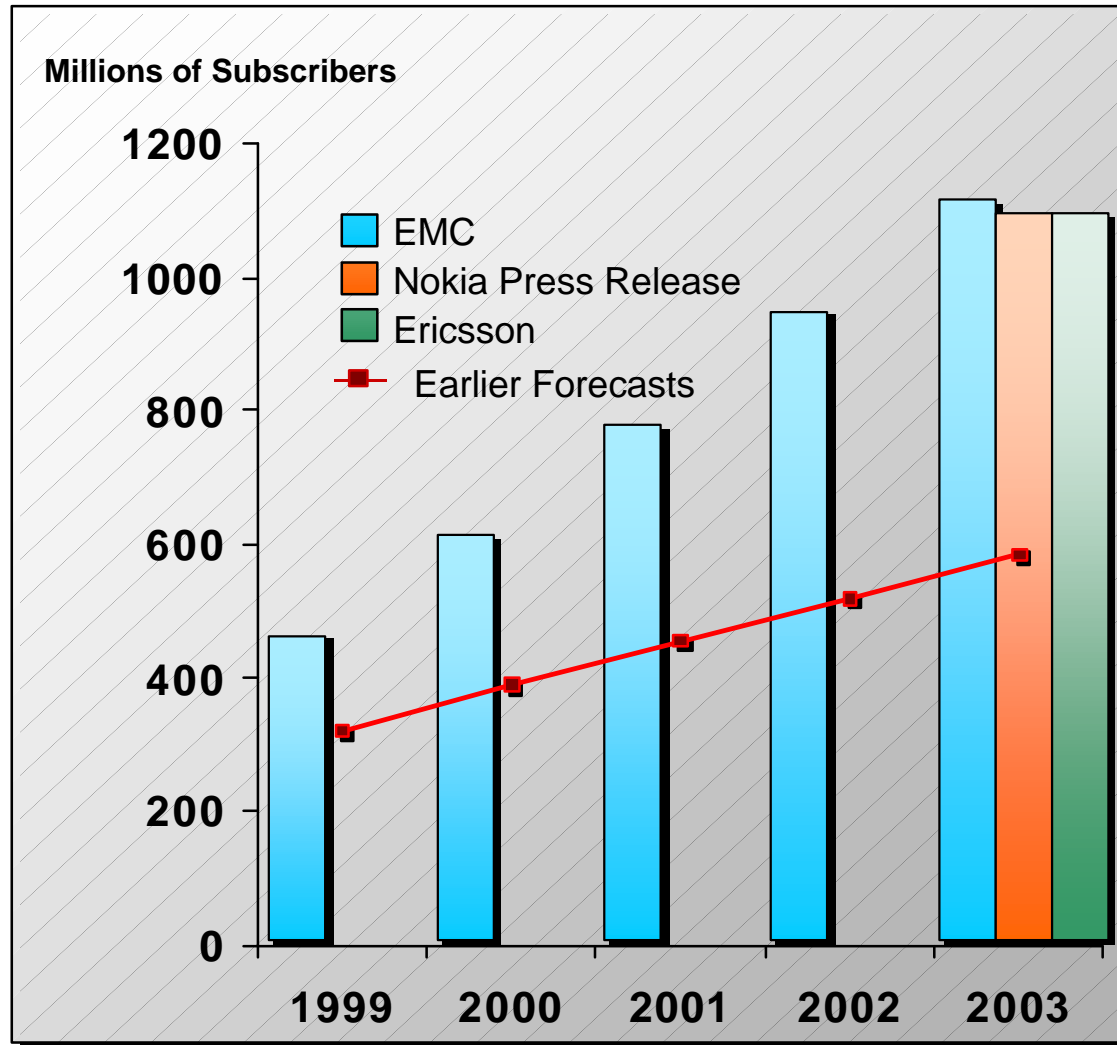

- 1 Bn subscribers by 2003

KEY TRENDS IN MOBILE

Contrary to earlier forecast 1 Billion Mark reached in 2003 !!!

Earlier forecasts are from Ovum, Analysis, Merrill Lynch & ADL

Prepaid has been the major stimulus for growth in Western Europe

Prepaid New Subscribers as % of total new adds in 4Q98

Business Plans of the most advanced operators show an increase in ARPU in the years to come

Sonera – 12 March 1999

ARPU

Sonera's Domestic Cellular Business (EUR m)

Year Ended December	1997	1998	1999F	2000F	2001F	2002F	2003F	2004F	2005F	2006F	2007F
<i>Sonera Cellular Revenues</i>											
Subscriber ARPU per Month (EUR)	34.6	36.5	37.5	39.5	41.0	42.5	44.0	45.0	46.0	47.0	48.0
Subscriber ARPU per Month (US\$)	39.2	41.2	42.4	44.6	46.3	48.0	49.7	50.9	52.0	53.1	54.2
Total Subscriber Revenues	606	799	951	1,088	1,200	1,301	1,395	1,466	1,532	1,600	1,669
Annual Application ARPU (EUR)	0	0	0	106	106	106	106	106	106	106	106
Annual Application ARPU (US \$)	0	0	0	120	120	120	120	120	120	120	120
Total Application Revenues	0	0	0	10	31	53	75	96	118	139	161
Total Revenues	606	799	951	1,098	1,232	1,354	1,469	1,563	1,650	1,739	1,830
<i>Growth</i>	34%	32%	19%	15%	12%	10%	9%	6%	6%	5%	5%
Monthly ARPU per Unit (EUR)	34	38	39	39	38	37	37	36	36	35	35
Monthly ARPU per Unit (US \$)	39	43	44	44	43	42	42	41	40	40	39

Growth

- 1 Bn subscribers by 2003
- Pre-Paid driving
- ARPU stabilizing

KEY TRENDS IN MOBILE

Internet/Data services

- 1 Bn subscribers by 2005

Growing Worldwide Internet Users

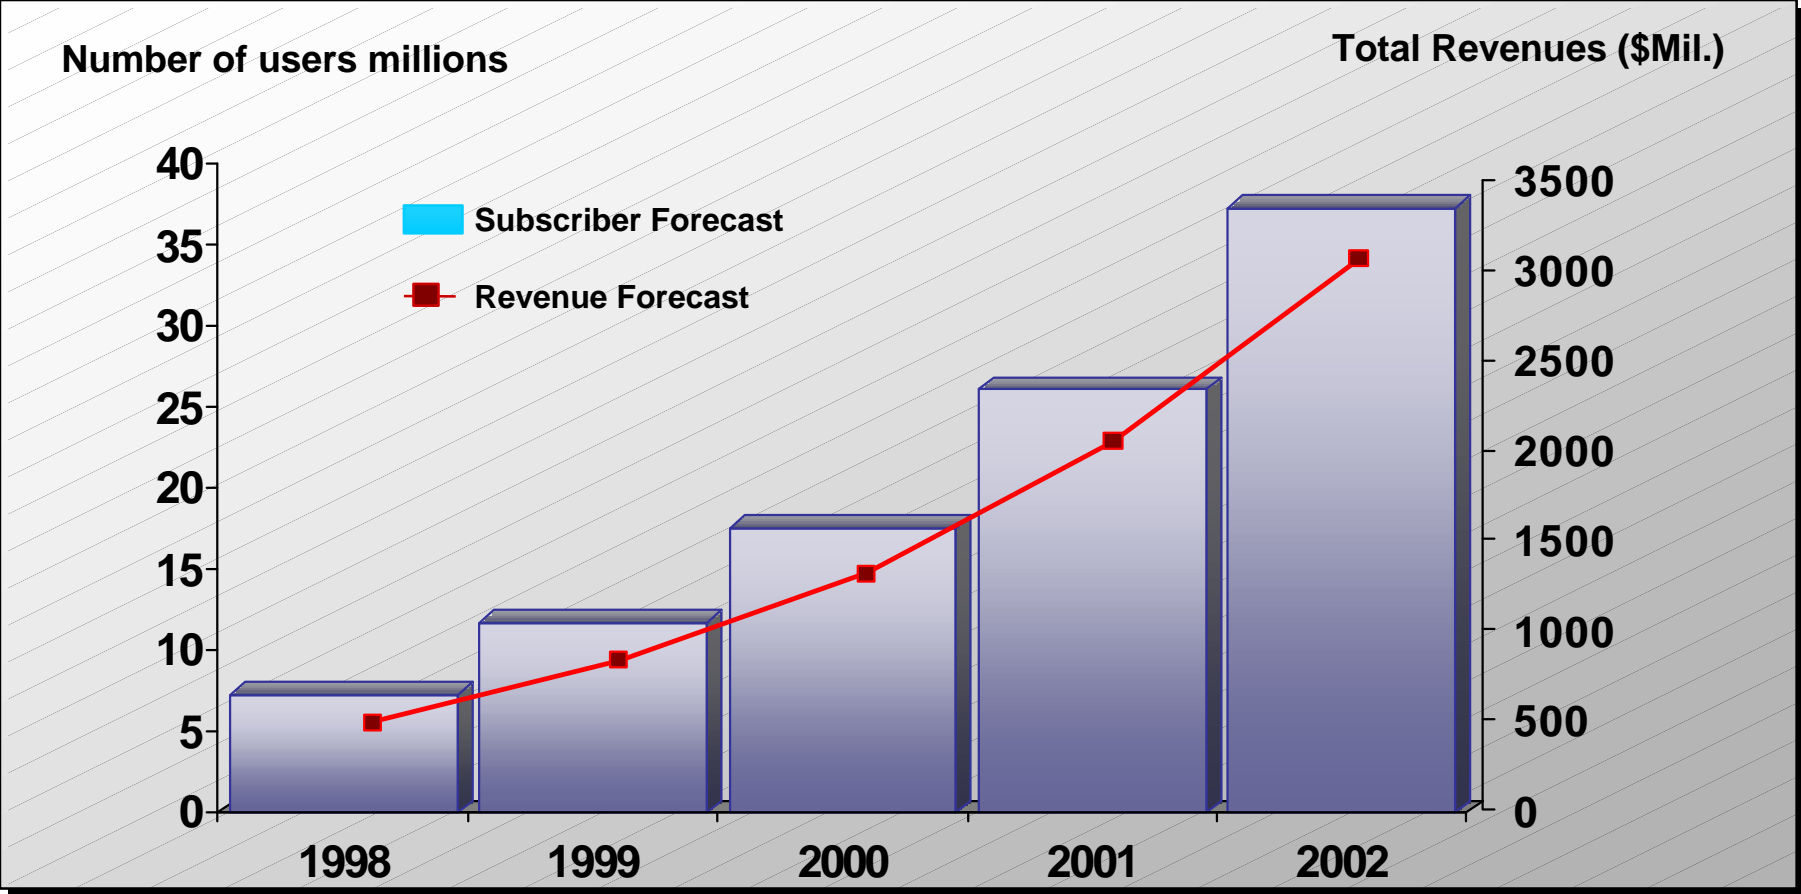

- Internet subscribers grew from 62 m in 1996 to more than 170 m in 1999.
- Traffic on the Internet has been doubling every 100 days.
- According to *the emerging digital economy*, a USDC 1998 report:
 - Over one billion people are expected to be online by 2005.

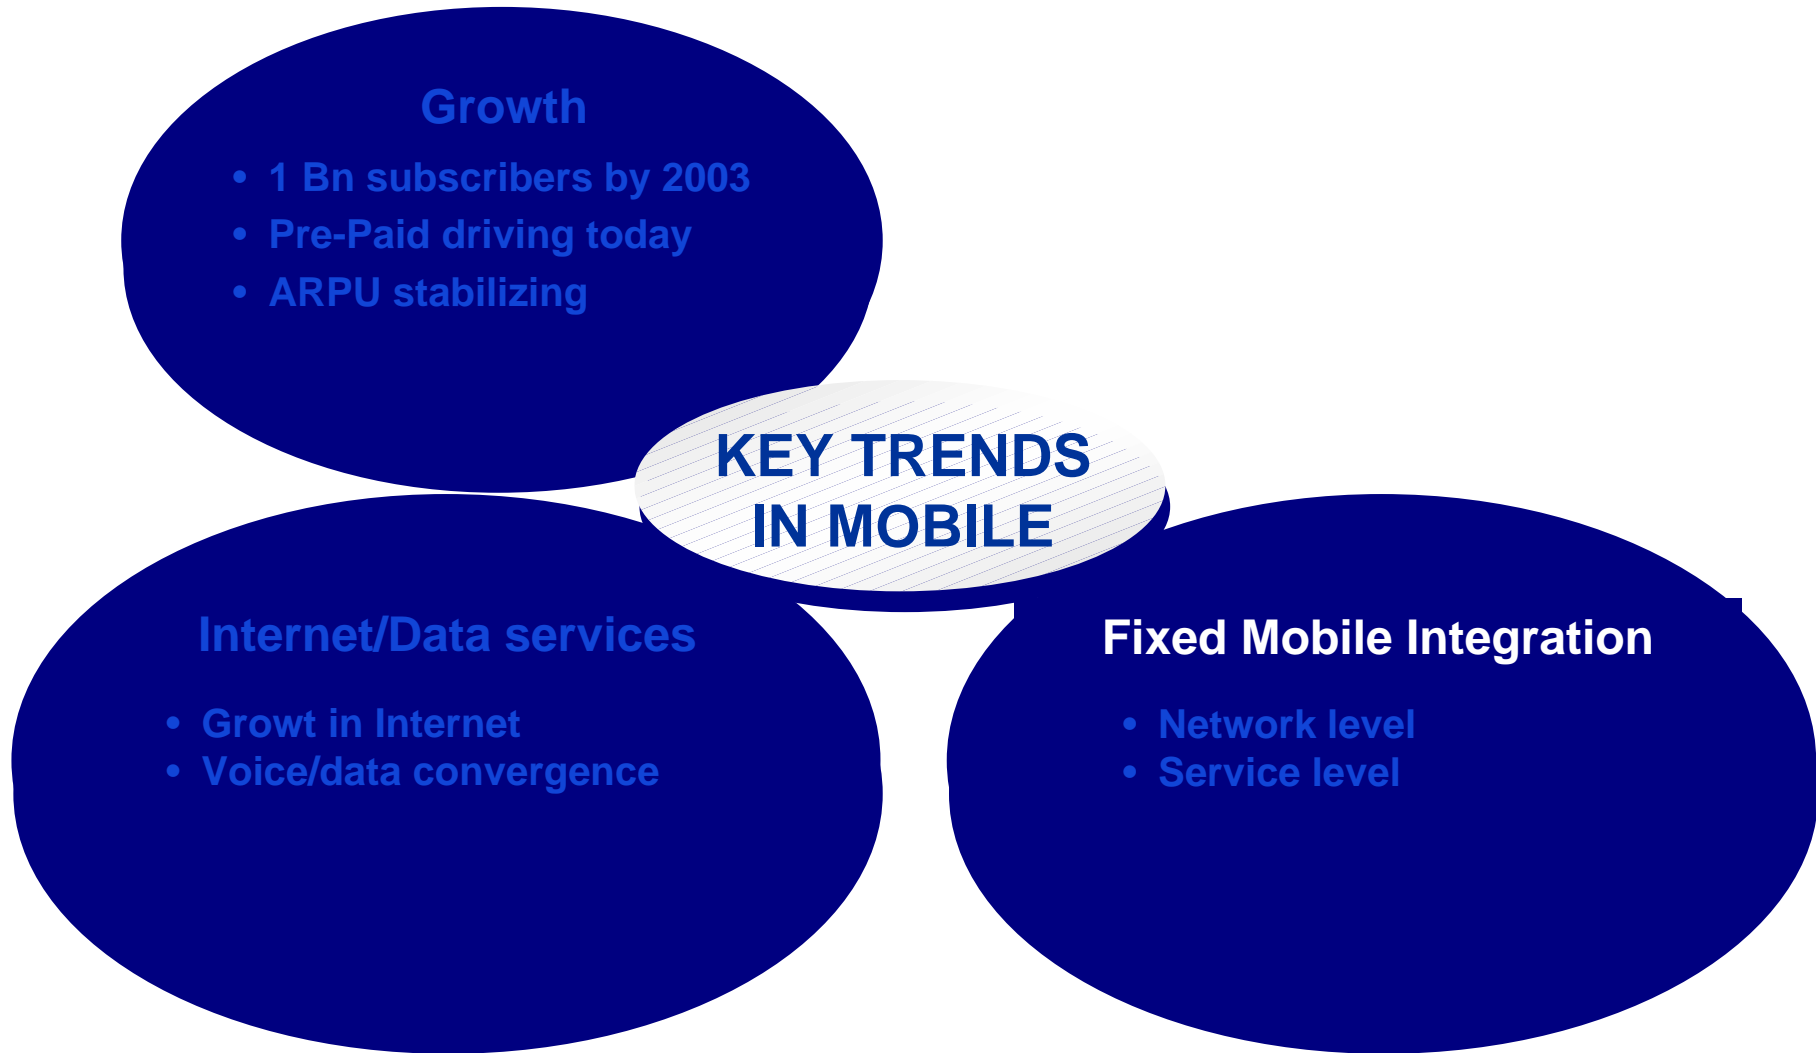

SMS is becoming a major driver for several traffic generation operators

Volumes of SMS messages sent in W. Eur. Has doubled in last six months and now tops 1 bil./mo. Mark (excluding voice mail notification messages)

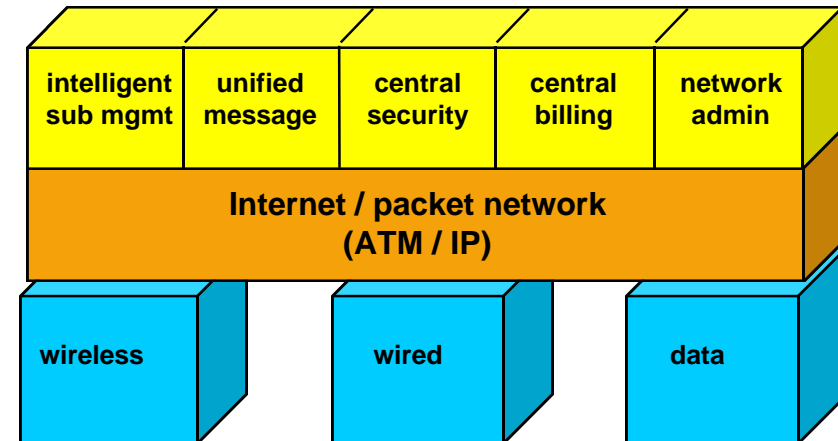

Transformation to Seamless Services

Today's Business Environment

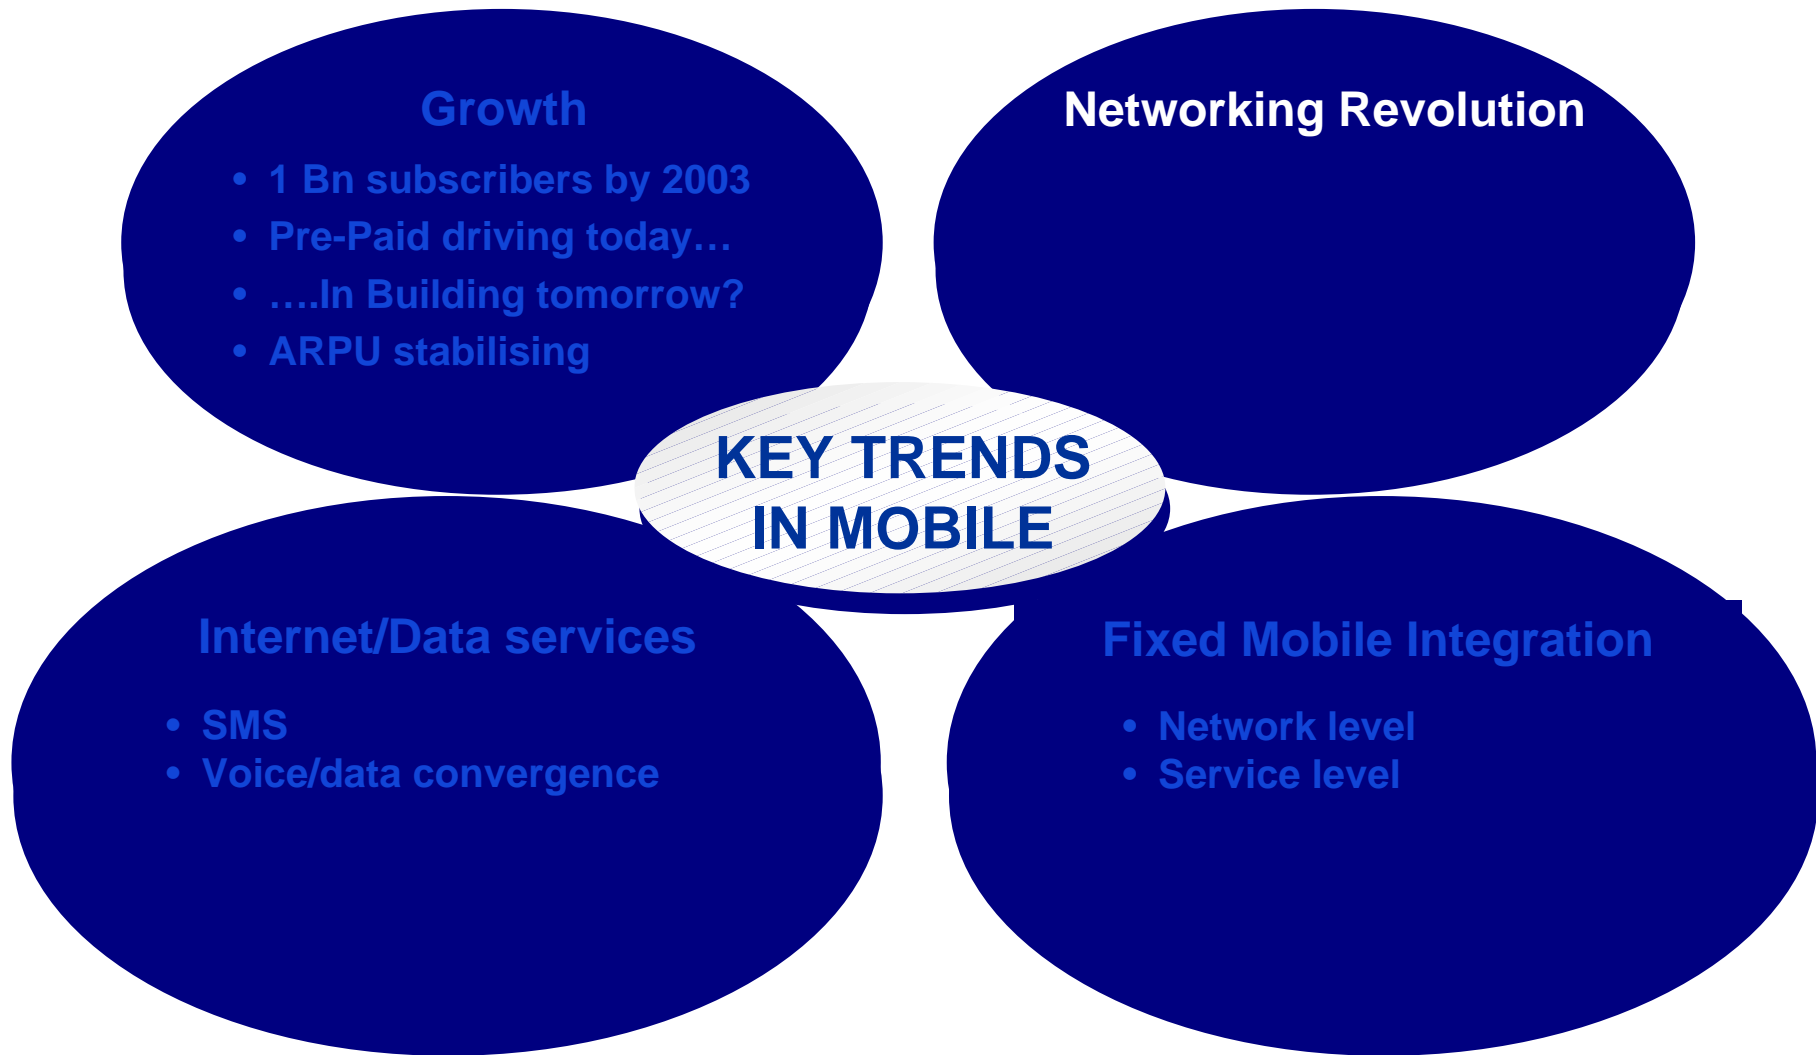

- Replication of services
- Network-specific content

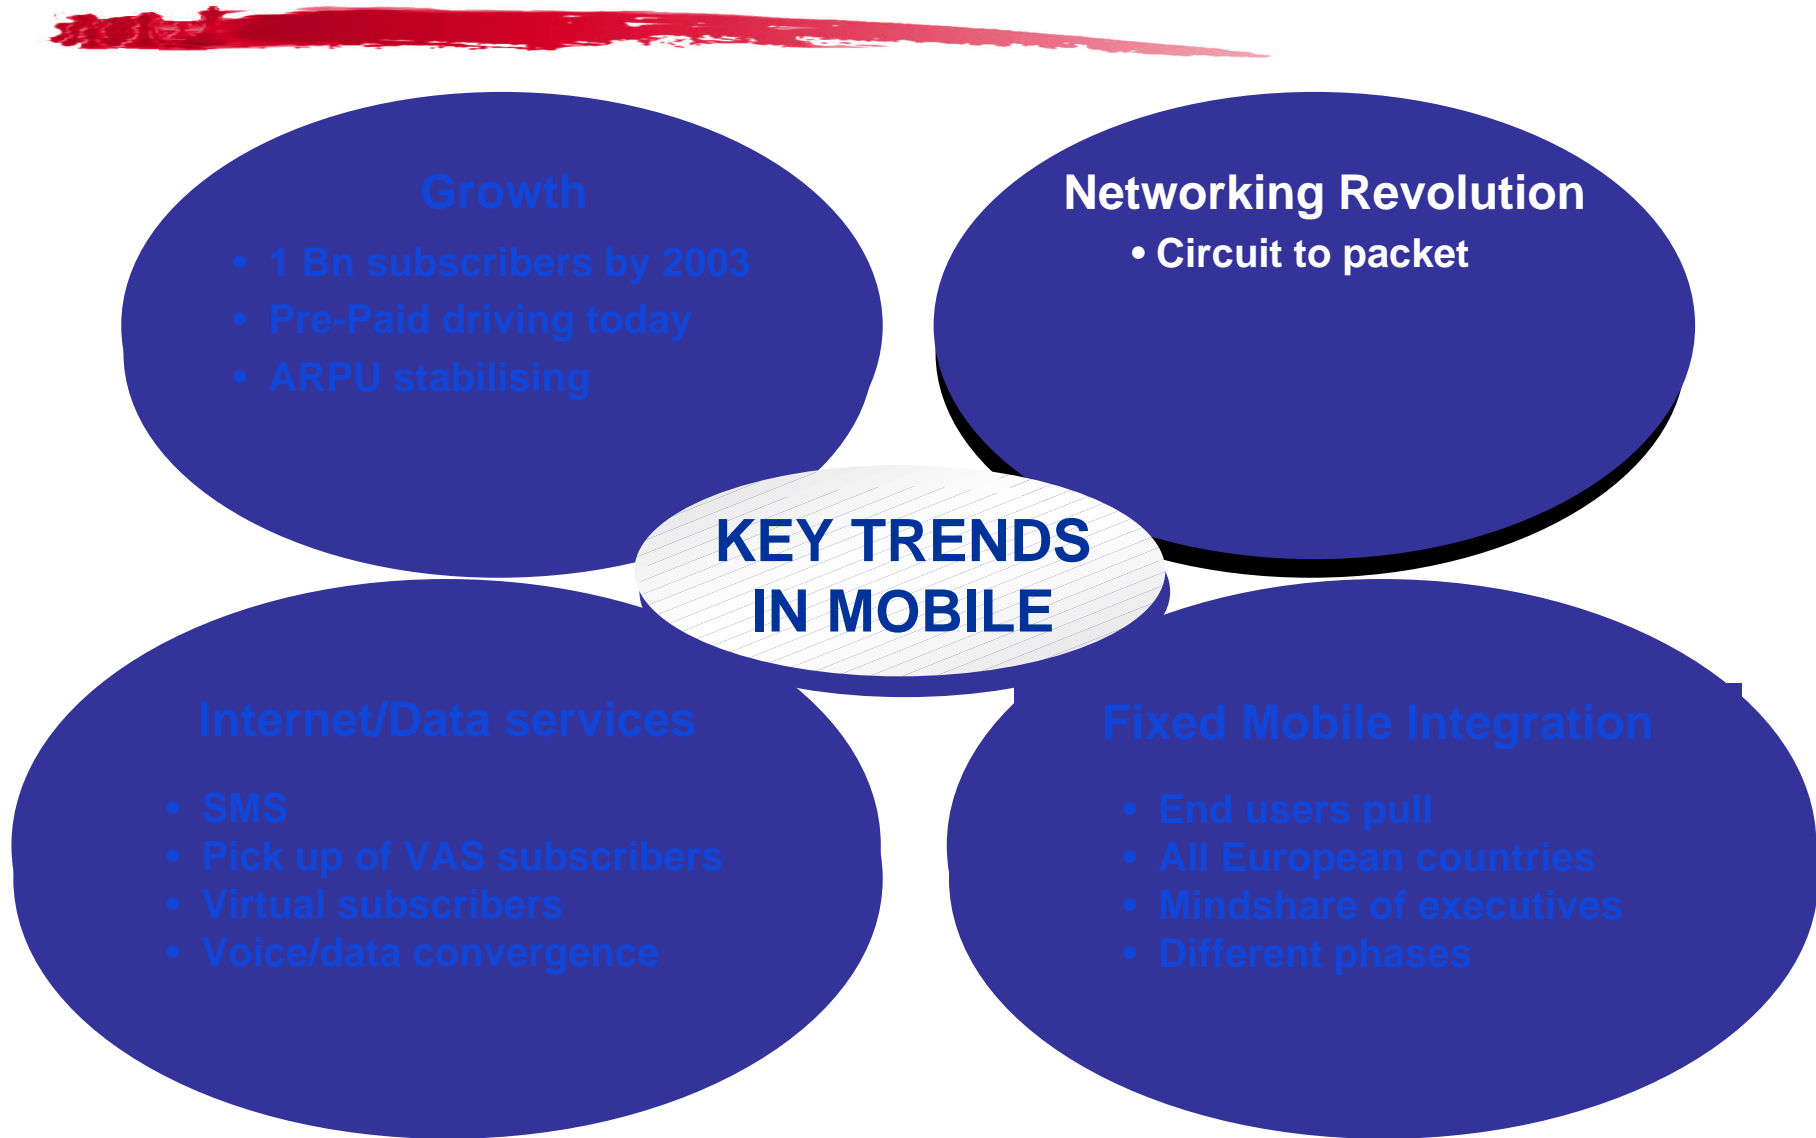

Next Generation Communications Networks

- Content-driven environments
- Seamless, integrated service
- Access distinctions minimized
wireless and wireline
voice and data

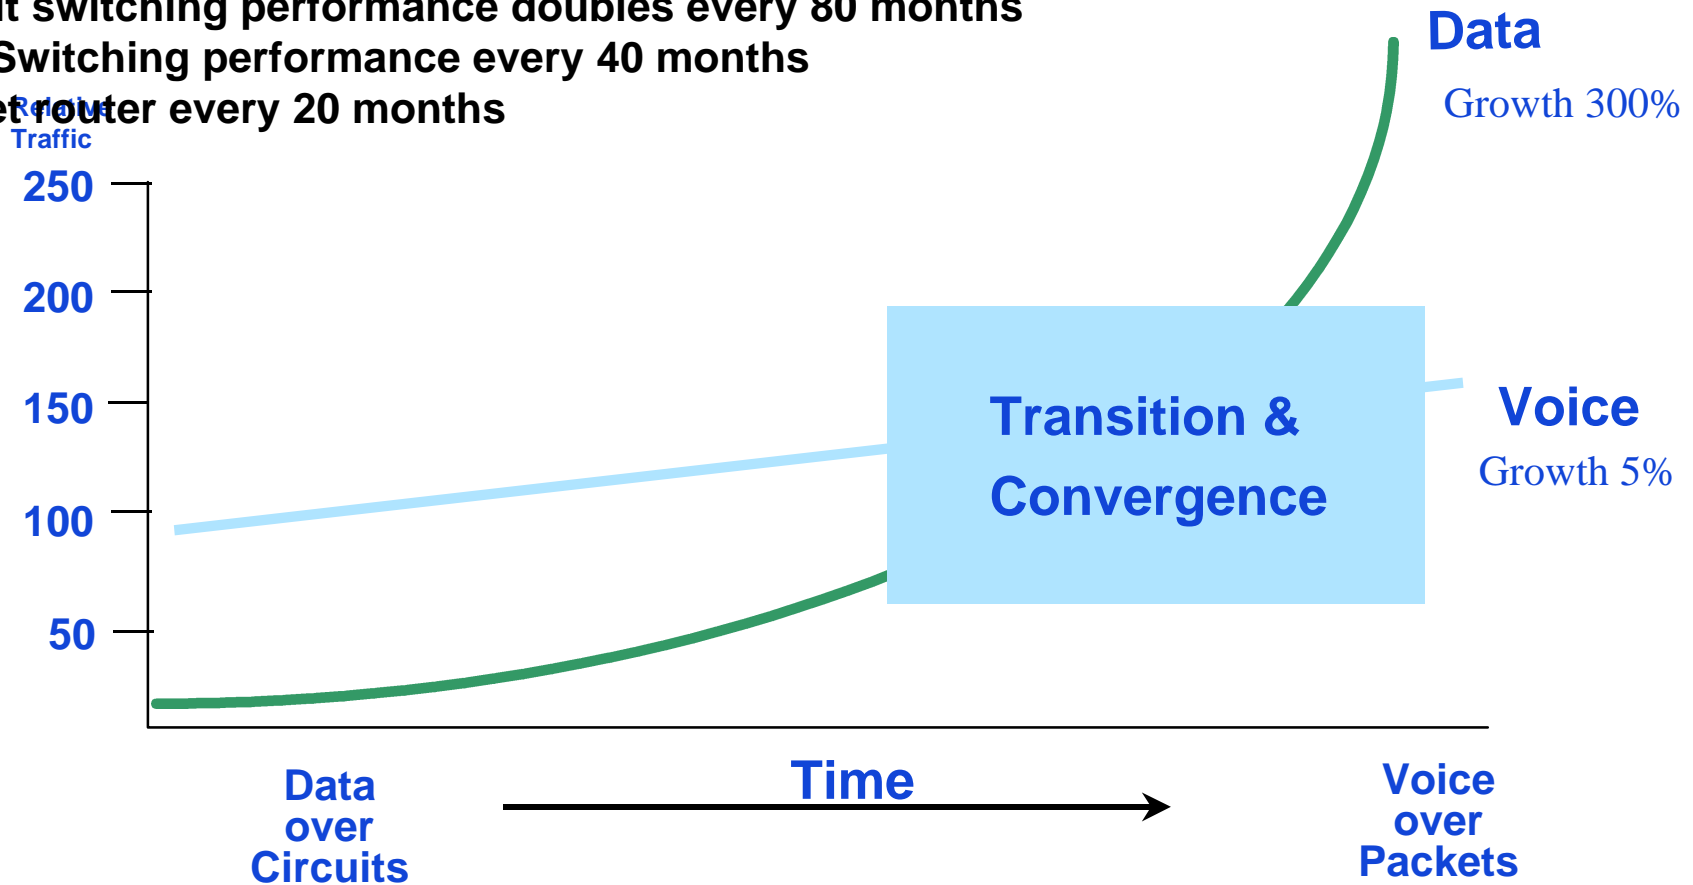

Changing Traffic Mix Networks

The explosion of data traffic was caused by/has led to a significant improvement in the cost/performance of packet switched technologies:

- Circuit switching performance doubles every 80 months
- ATM Switching performance every 40 months
- Packet router every 20 months

Today's topics

- Key Trends in Mobile
- **Requirement for next generation wireless network**

Requirement for the Next Generation Core Network

The next generation core network should:

- Allow for rapid creation of new services (voice/data/multimedia) leveraging the creativity of independent software vendors to the fullest
- Be based on a technology with the best cost/performance curve
- Allow voice and data traffic to be combined into one network, with all the associated operation benefits
- Be “access-agnostic”
