

The background is a stylized illustration of a Chinese landscape. A large, glowing full moon is the central focus. To the left, three red lanterns with yellow flames are floating. The landscape features blue and green mountains, white clouds, and three white cranes in flight. The overall style is traditional Chinese ink wash painting with a modern, vibrant color palette.

After getting off, there will have about 500m of uphill steps to the nearest **Yupinglou Hotel** (Jade Screen Hotel) and the Guest-greeting Pine - the most famous landmark on Yellow Mountain. Yungu Cable Car (云谷索道), started in 1985, is one of the earliest passenger ropeway used in China. The upgraded cableway was put into use in 2007 with 18 supports. Each cable car can carry 8 passengers. The ropeway equipment and all else sets adopted on Huangshan are designed and provided by Doppelmayr, a world's leading manufacturer of cable cars and ropeways from Austria. The level difference is nearly 775m, but it rides very smoothly and slowly with the highest speed of 6 m/s.

If you get into Huangshan Mountain from **Tangkou Town** (汤口镇) through **Southern Gate Entrance** ([How to Get to Tangkou Town >>](#)), and start from Back Mountain, you can take the Yungu Cable Car on the eastside. By 10 minutes riding, tourist will ascend to **Baieling Station**, nearby Beginning to Believe Peak, Lion Peak. All the way up the scenery is spectacular while passing Celestial Capital Peak, if weather is good. **Beihai Hotel** is the closet hotel on uphill area, about 1.5 hours downhill walking from Baieling Station. At the Yungu Cable Car Station, you can purchase tickets for both entrance and cableway. Expect huge tour crowds and long queues, especially during major Chinese national holidays. Skip the Yungu Cable Car, it takes you about 3 hours or more, nearly 8~10km of steps upwards. Tourists could also take Yungu Cable Car down and return back to Tangkou Town.

3. Taiping Cableway (太平索道):

Oct. :Total 160 RMB; One-way: 80 RMB

Taiping Cable Car - Short Cut to Bright Summit, Xihai Grand Canyon, Xihai Hotel

Length & Duration: about 3709m, 8~12 mins

Opening Hours: 07:00 am - 16:30 pm (Monday ~ Sunday)

Nearby Attractions: Bright Summit, West Sea Grand Canyon, Flying-over Rock

Currently, Taiping Cable Car (太平索道) is the longest and the largest passenger cableway in Huangshan and Asia. It begins from the Songgu Temple (松谷庵) down mountain and gets to Paiyun Pavilion (排云楼) in West Sea Scenic Area, rising about 1014.5m. Among the three cableways up mountain, the north Taiping Cable Car is the lesser chosen option, for the complicated transfer to get there.

It is the easiest and least physically demanding route to arrive the nearest **Paiyunlou Hotel** and **Xihai Hotel**. If you can't climb so many steps (uphill hiking on this route needs 4 hours), but want to see the essence beauty of Xihai (West Sea) Grand Canyon, you can enter from North Gate Entrance, take Taiping Cable Car to go up. Then, have a quieter start route, shorter waiting time and longer time to enjoy breathtaking views. After getting off, walking 1km and head towards the closet Xihai Grand Canyon takes 15 mins, 30 mins to Beihai, and further to Bright Summit and view **Flying-over Rock** and **Cloud Dispelling Pavilion** on the way. We suggest you take some time to enjoy view of Xihai from Paiyun Pavilion, where the scenery changes by minutes depending on fog and mist levels blown around.

4. West Sea Grand Canyon Cableway (西海大峡谷索道)

Oct. Total 200 RMB; One-way: 100 RMB

Xihai (West Sea) Cable Way - Go down in Xihai Grand Canyon and Up to Bright Summit

Location: Xihai Grand Canyon

Running between: Paiyunxi (Cloud Dispelling) Station 排云溪站 ⇄ Tianhai (Heavenly Sea) Station 天海站

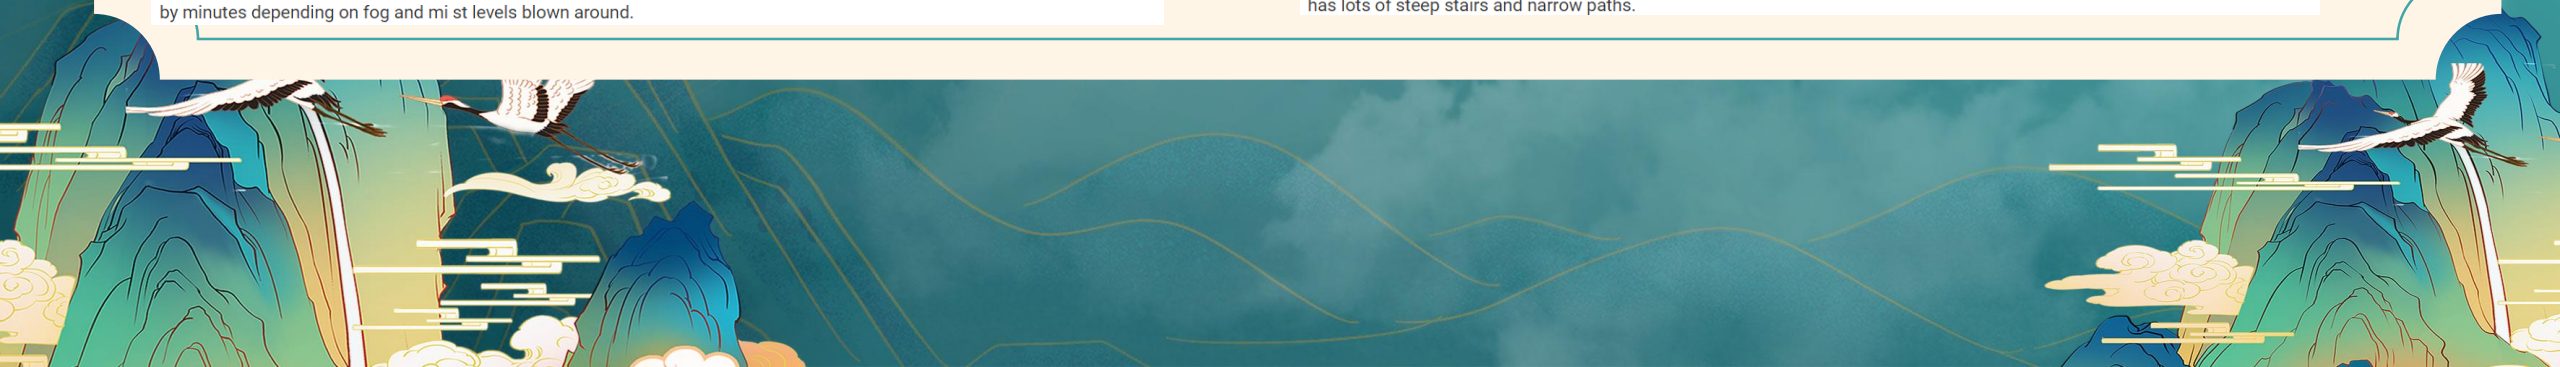

(One-way)Ticket: 100RMB (March ~ November), 80RMB (December ~ February)

Length & Duration: about 892m, 5~8 mins

Opening Hours: 08:00 am - 17:00 pm (Monday ~ Sunday)

The West Sea Cable Car (西海大峡谷地轨缆车), located in the southern valley of **West Sea/Xihai Grand Canyon**, is the convenient transport from bottom of the valley to Bright Summit. The whole monorail ascends with a 34% gradient, rising about 497m from Paiyunxi Station to the up Tianhai Station. The car offers fully enclosed transparent carriages with 3 levels, which are able to hold 60 passengers one way. No seats are provided, and all passengers will stand. Note that coming down and up is very quick, but you may meet long lines waiting to get on the cars.

Normally, hiking from Paiyun Pavilion down to the valley floor (via 1st and 2nd Ring) takes about 1 to 1.5 hours. Extra 4 hours is needed to hike uphill to **Baiyun Hotel**, a very strenuous route. Therefore, most tourists **take the tram-cable car up** the mountain, just within 8 minutes, then head towards **Bright Summit**, Turtle Peak, Flying-over Rock and other scenic wonders around. Still, some people take the monorail down to the bottom to save time and protect knees, because the downhill hiking has lots of steep stairs and narrow paths.
