Welcome to Jeju

AN ISLAND THAT OFFERS SOMETHING MARVELOUS EVERY DAY

Jeju is a small island but it offers something new and marvelous every day. From the picturesque Jeju Olle Trails of which concept has been exported to Japan and Mongolia, more than 360 oreum or volcanic cones, Mt. Hallsan which stands proudly at the center of the island, horses running across the luxuriant vegetation, fruitful tangerine trees and Jeju's haenyeo (female divers) waking up the dawn of the ocean, Jeju is simply an island of endless wonders.

Welcome to Jeju

UNESCO Triple Crown Designation is **only Jeju** in the world

Registered as a UNESCO
World Heritage Site in 2007

Appointed to the World Network of
Biosphere Reserve in 2002

Appointed to the Global Geoparks
Network in 2010

Population	646,450 (51,378,174 in South Korea)	Climate	Subtropical with four distinct seasons
Area	1,848 km ² (99,720 km ² in South Korea)	Rainfall	Jeju 1,456.9mm, Seogwipo 1,850.8mm
Length	73km	Temperature	Jeju 15.5°C Seogwipo 16.2°C
Width	41km	Highest Point	Mt. Halla 1,950m
Coastline	258km (181 km coastal ring road)		

Jeju Attractions

SEONGSAN ILCHULBONG

This tuff cone formed when an underwater volcano erupted in the middle of the ocean. It was designated as a national monument due to its high value for reservation. It was registered as a UNESCO World Natural Heritage Site in 2007 and UNESCO Global Geopark Site in 2010.

MANJANGGUL (CAVE)

This is the world's largest known lava tube created by volcanic activity. You can feel the magnificence of the landscape that resembles being inside an underground palace.

UDO

Udo (Cow Island) is so named because it resembles a cow lying down. Its blue sea, cozy meadows and white sandy beaches are particularly impressive. The night view of Udo under the stars has a different kind of beauty.

Jeju Attractions

HALLASAN NATIONAL PARK

Hallasan is the highest mountain in South Korea with an altitude of 1,950 meters. It was created through volcanic activity and was designated as a UNESCO Biosphere Reserve. There are five mountain climbing courses, but only the Seongpanak course and Gwaneumsa course will get you to the top.

SEOPJIKOJI

This place is a famous filming location for a Korean drama. In the spring, there is magnificent coastal scenery and yellow canola flowers, with the backdrop of Seongsan Ilchulbong (Sunrise Peak). In the fall, it takes on a romantic atmosphere when the wild flowers bloom and the gold reeds blow in the wind.

JUSANGJEOLLI CLIFF (JUNGMUN DAEPO COAST)

Jusangjeolli is the largest natural monument in South Korea that was created when lava overflowed from the mouth of a volcano and was cooled quickly. The stone pillars look like screens that were set up like stairs.

Jeju Local Dishes

HEUKDWAJEJI-GUI (GRILLED BLACK PORK OF JEJU)

Jeju black pigs are grown cage-free. The meat is tender and nutritious. Grilled to perfection, black pork is deliciously chewy and has little fat.

SEONGGE MIYEOKGUK (SEA URCHIN SOUP)

Seongge, or sea urchin, is harvested by women divers of Jeju. A bowl of seaweed and sea urchin with its eggs carries scents of the sea. Traditionally, sea urchin soup has been made on special occasions or banquets.

GALCHI CUISINE (HAIRTAIL FISH DISHES)

Galchi, or hairtail fish, is commonly caught in Jeju, and it is cooked in various ways. Galchi-hoe is slices of freshly-caught raw hairtail fish; galchi-guk is soup made with green pumpkin; galchi-gui is grilled hairtail fish; and galchi-jorim is hairtail fish simmered in a spicy sauce with radish.

<https://jejuv.or.kr/>

Jeju Local Dishes

HAEMUL TTUKBAEGI (SEAFOOD SOUP)

Haemul Ttukbaegi is cooked with assorted seafood, such as small obunjagi, crab, and red-banded lobster. You can taste the fresh seafood alongside the rich flavors of the soybean paste broth.

MEAT NOODLES

After stewing broth, add noodles and boiled meat. Then add chili, chili powder, pepper and other seasonings according to your taste. One plate of meat noodles is enough to fill a person as it contains thick noodles with boiled meat.

SAENGSEON HOE (SLICED RAW FISH)

Raw fish is a common dish in Jeju. You'll find countless varieties of raw fish in Jeju, including yellowtail, hairtail, mackerel, cuttlefish, and premium sawedged perch.
