Title: **TD-SCDMA Forum Request for MRP Status in 3GPP**

Agenda item: **7.2**

Document for:

Decision	**X**
Discussion	
Information	

1   Introduction

Correspondence has been received from the TD-SCDMA Forum in which they request MRP status within 3GPP. This request was notified to the PCG exploder list on 11 March 2003.

The correspondence received from the TD SCDMA Forum is attached to this document, together with a set of slides which describe their work.

2   Action required by OP#9

The 3GPP Partners are requested to consider this request and to grant MRP status to the TD SCDMA Forum.

The TD SCDMA Forum had initially registered their intent to participate in this meeting, but cancelled their participation due to travel concerns.

Dear Mr. Scrase,

The TD-SCDMA Forum is an Industry representative body established for promoting the further development and promotion of the ITU IMT-2000radio technology being standardized within 3GPP and is classified as TDD low chip rate mode. This technology is known in China as TD-SCDMA. In this context, it is clearly within our remit to assist industry in the deployment and promotion of this technology and in turn to respond to what we see as the market requirements of this 3GPP technology.

The TD-SCDMA Forum fully supports the work that has been done within 3GPP and has high admiration for the way in which the current requirements of TD-SCDMA have been understood and accommodated within your specifications. However, as we now start to look more closely at the deployment of the technology and the delivery of services to our customers, it seems more reasonable that we establish a much closer collaboration with you in order that we can assist in clarifying the market requirements of TD-SCDMA and promote the work of 3GPP. It has been proposed by WTS, the Organizational Partner in 3GPP from China, that Market Representation Partner status would be the most suitable vehicle for us to assist you and we understand that they fully support our application.

More information about the work of our Forum can be obtained from the following site http://www.tdscdma-forum.org.

We would be grateful if you could provide the above information to your Organizational and the Market Representation Partners (OPs and MRPs) and also provide us with further information on how the TD-SCDMA Forum application for Market Representation Partner status may be progressed within 3GPP.

We understand that there will be 3GPP OP/PCG meeting held in Ottawa, Canada on 2nd May, 2003 and would be pleased to provide any further information at that meeting as well.

Yours sincerely,

Jin Guo Qiang
General secretary of TD-SCDMA Forum

TD-SCDMA Forum Introduction

At present, forum has over 410 members. The Forum will provide a platform for worldwide operators, manufacturers, research institutes, educational services, standardization organizations and other companies or groups to communicate and cooperate the TD-SCDMA technology and to promote the development of TD-SCDMA and related products.
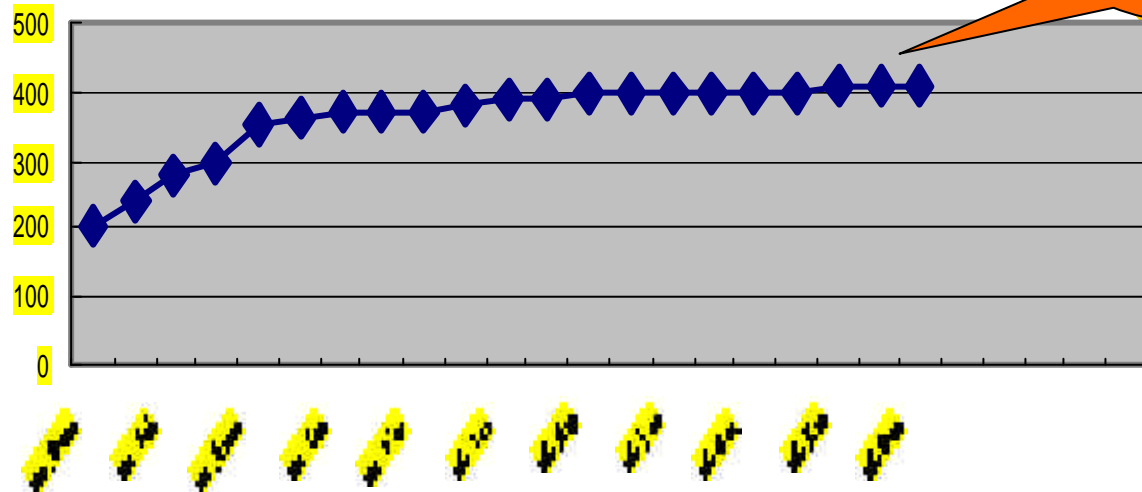

Forum has organized many TD-SCDMA seminars and communication between Chinese government and companies. Forum has played a more important role in promoting the industrialization of TD-SCDMA technology.

Working Scope of TD-SCDMA Forum

- Propagandize and promote the TD-SCDMA Technology;
- Develop domestic and international academic exchanges, promote the evolution of the TD-SCDMA technology ;
- Promote the industrialization of TD-SCDMA and eventually drive the worldwide application of the TD-SCDMA in the future;
- Establish working groups to implement monographic research, promote the development and consummation of the TD-SCDMA technology;
- Set up and manage website of the TD-SCDMA Forum;
- Edit and publish forum periodicals;
- Hold seminar and demo conference periodically;

Actively enlarge TD-SCDMA Forum member team.

410
Members

Member Introduction

:

Forum has over 410 members, including fifteen Council members
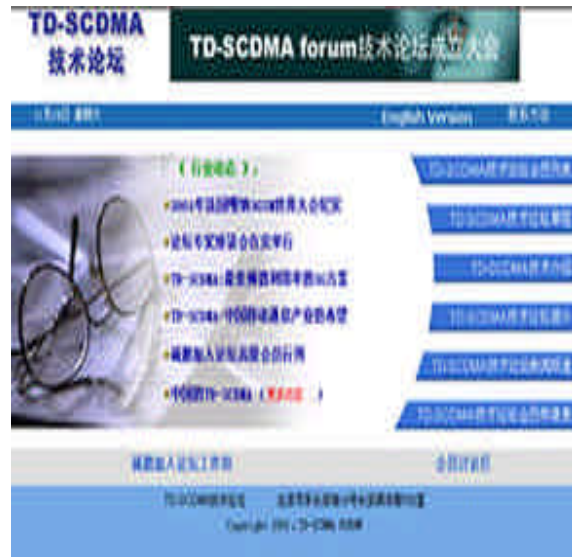

- China Mobile Communications Corporation
- China Telecommunication Corporation
- China United Telecommunication Corporation
- China Netcom Communications Group Corporation
- Datang Group
- Huawei
- Interdigital.
- Motorola
- Nortel.
- Qualcomm
- Railway Telecommunication and Information Co., Ltd.
- Shanghai Bell Alcatel
- Siemens
- UTStarcom
- ZTE

Member Introduction

Forum has 12 senior members :

- Acer
- Analog Devices
- Fujitsu
- Guang Zhou Communication Research Institute
- Intel
- LG
- MCCI
- Philips
- Racal
- Sandbridge
- Samsung
- TI

Future of TD-SCDMA Forum

- **Striving for beneficial policy support**;

- **Seeking for various financing channel for TD-SCDMA**;

- **Enhancing the decision making ability of the overall development of TD-SCDMA;**

- **Promoting the multi-channel industrial cooperation between enterprises;**

Future of TD-SCDMA Forum

I. Keep more closely communication with governmental departments, strive for beneficial industrial policy and put up further reference and suggestions for the government's decision making.

1. Coordinate and put up a report of practicing possibility concerning TD-SCDMA's market scale and its influence to national economy.

2 . Match the advantageous policy support made by governmental departments .

3. Push the government to found a organization or institute which has overall decision making authority on the TD-SCDMA technology's developing program.

4. Win for financial support for TD-SCDMA .

Future of TD-SCDMA Forum

II. Make further promotion of the speedy development of industrialization in China, and enlarge and deepen the influence of TD-SCDMA Standard and increase its internationalization.

1. Win for operators' participation and break through the absent situation of operators on the industrial chain.

2. Try to realize multi-manufacturer supply. Push main companies to reduce IPR charge.

3. Carry out active actions for financing so as to win for multi financial support for TD-SCDMA Standard .

Future of TD-SCDMA Forum

? .   Make full play of the role of Forum as authority and neutral platform, promote the cooperation between enterprises.

1. As the authorized platform of TD-SCDMA, Forum will publish information .

2. Forum specially accepts enterprises' development application and get involved in the cooperation between enterprises.

3. Recommend eligible council members of TD-SCDMA Forum to join TD-SCDMA Industry Alliance.

Future of TD-SCDMA Forum

IV. Expand service mode, and offer more service in a wider range for members.

1. Provide customized information and market data to member units.

2. Take advantage of the industrial resource of Forum, help members to seek opportunities for cooperation.

3．Help members to carry out new production announcement and marketing promotion.

Future of TD-SCDMA Forum

V. Publish information of authoritative TD-SCDMA Information, and publish market research report.

1. Announce the overall development status of TD-SCDMA.

2. Release newest information of TD-SCDMA Industry Alliance

3. Release official information about TD-SCDMA standard

4. Publish TD-SCDMA related data and market information.

5. Cooperate with authoritative organization to publish market research report and analysis on TD-SCDMA.

Future of TD-SCDMA Forum

VI. Exert all efforts to promote TD-SCDMA standard as always

1. Enhance the publicity of TD-SCDMA by means of media propaganda and cooperation, etc.,

2. Strengthen communications with international organizations and standardization organizations to win for their support for TD-SCDMA standard.

3. Organize large-scale events to enlarge the influence of TD-SCDMA.

4. Expand the member team as always .

Thank You!
