3GPP RAN WG4 would like to thank RAN WG1 for having sent to RAN WG4 a liaison statement related to fast closed loop power control in FDD mode, R4-99377.

RAN WG4 wants to inform RAN WG1 that it has decided to change the name of “closed loop power control” in the specifications TS25.101 to inner loop power control, in comparison to the outer loop power control. Furthermore the requested step sizes have been agreed to incorporate in the specifications.
