Title: Liaison statement on Slow transmit power control
To: TSG RAN WG1

WG2 thanks WG1 for the liaison statement on power control issues.

WG2 is currently studying Slow Transmit Power Control. From the point of view of the higher protocol layers, WG2 has not identified any problems. However, WG2 is seeking guidance from WG1 in assessing the benefits of Slow Transmit Power Control, before concluding on this issue. WG2 would also like to know the status of this work item in WG1.
