

**TSG RAN Working Group 1 Meeting #9
Dresden, Germany, November 30 - December 3**

TSGR1#9(99)i32

TSG-RAN Working Group 2 (Radio L2 and Radio L3)
Cheju, Korea, 2 - 5 November 1999

TSGR2#8(99)g60

To: RAN WG1
Source: RAN WG2
Title: Liaison statement on the mixture of primary and secondary scrambling codes

RAN WG2 would like to inform our agreement of "mixture of two scrambling codes for one CcTrCH". In the current TS25.331 RRC Protocol Specification ver3.0.0, it is only allowed to use one scrambling code for one CcTrCH. However, in RAN WG2 #8 meeting at Cheju, Korea, we have recognized the flexibility in the code assignment to allow the mixture of two scrambling codes for one CcTrCH. Therefore RAN WG2 have updated TS25.331 specification according to this decision.
