3GPP, Joint TSG RAN WG1 (R1) and TSG SA WG4 (S4) meeting *R1-99h84*

Paris, France
November 19, 1999

Source: R1 Chairman

DRAFT AGENDA FOR R1 & S4 joint meeting

1. Approval of the agenda

2. Class 1 bit allocations for AMR

- **The relation of number of class 1 bits and blind rate detection (BRD)**

- **(R1 to S4) Liaison statement on updating the number of AMR speech bits (R1-99H60)**

- **related input documents**

3. AMR support in the physical layer: Mode Commands

- **Alternatives in different layers (introduction by chairman)**

- **Minimum Requirements from S4 for mode commands transmission (Minimum rate, Quality etc)**

  - **(R1 to S4) Liaison statement on requirements for fast switching between AMR modes (R1-99H67)**

- **(R1 to S4 and R2) Liaison Statement on transmitting AMR Mode Command bits (R1-99H66)**

- **(R2 to R1 and S4) Response to Liaison Statement on transmitting AMR Mode Command bits (R2-99G62)**

- **Contributions on the Mode command transmission**

4. AMR support in the physical layer: AMR service implementation capability

- **(R1 to R2, T2 & S4) Liaison on Physical Layer Service Implementation Capabilities (R1-99H63)**

- **(R2 to R1 & S4) Response to Liaison on Physical Layer Service Implementation Capabilities (R2-99g61)**

- **Number of transport channels for AMR**

- **Feedback/questions from S4 side**

5. AMR characterization testing.

- **S4 plans of characterization testing (number of test cases etc.)**

- **Scenarios from R1 perspective worth including**

6. Summary of the conclusions.

- Expected actions by different working groups for finalising AMR support for release –99.
