Title: Draft EMC/Regulatory Table 1 of Regional Requirements for Terminals

Document for: Information and Discussion

This contribution provides the first draft of a submission to the TSGT WG1/EMC, for the information of RAN WG4 members.

The submission is a first cut at trying to fill in the Table 1 developed at the last T1/EMC meeting of April 14th 1999 in Issy Les Moulineaux, and tries to put together a proposed list of the AREAS which should be included in the 3GPP Specifications work, and the REGIONAL REQUIREMENTS and Reference Documents/Sections for each of the Areas.

The information is being provided for the benefit of the RAN WG4 members, and is in a preliminary stage, subject to further verification and change.

Members are encouraged to contribute to the detail and accuracy of the information, and also to propose additions/changes to the Areas, the regions that should be included in the analysis, and the requirements content. It is hoped that the attached table can serve as a starting point for a completed table according to the T1/EMC Schedule. To facilitate the gathering of information in the Table, a soft-copy of the Excel spreadsheet table will be provided upon request, and as an attachment to this contribution.
