Title: Proposed Liaison Statement to the TSGS2 ad-hoc group on QoS
Document for: Discussion

TSGS1 has agreed on a Work Item on Quality of Service Requirements. In the WID it is stated, e.g., that the work shall be done in a joint group with TSGS1 and TSGS2 QoS experts.

TSGS1 has furthermore agreed on a working order for this WI, including a joint activity between TSGS2 and TSGS1 experts on QoS, especially to

- consult TSGS2 regarding which UMTS bearer service parameters that are relevant for the required types of communication schemes, and to
- consult TSGS2 regarding any specific need, e.g., UMTS bearer service negotiation and re-negotiation.

TSGS1 therefore proposes that such a joint TSGS2 / TSGS1 QoS experts meeting, possibly a part of a TSGS2 QoS ad-hoc meeting inviting participants from TSGS1, is called on this subject.

TSGS1 would welcome any comments from TSGS2 on this proposal and, if received favourable by TSGS2, would welcome a proposal for a suitable date for such a joint meeting.

The agreed working order, together with a proposed skeleton for a new chapter 5 of UMTS 22.05 are attached.
