Title: Liaison Statement to the TSGS2 ad-hoc group on QoS

Document for: Approval

TSGS1 has agreed on a Work Item on Quality of Service Requirements. In the WID is stated, e.g., that the work shall be done in a joint group with TSGS1 and TSGS2 QoS experts.

TSGS1 sees a need for a joint activity between TSGS1 and experts in the TSGS2 ad-hoc group on QoS, especially to

- consult the TSGS2 ad-hoc group on QoS regarding which UMTS bearer service parameters that are relevant for the required types of communication schemes, and to
- consult the TSGS2 ad-hoc group on QoS regarding any specific need, e.g., UMTS bearer service negotiation and re-negotiation.

TSGS1 therefore proposes that such a joint meeting, between the TSGS2 QoS ad-hoc group and participants from TSGS1, is called on this subject as soon as possible,.

TSGS1 would welcome any comments from the TSGS2 ad-hoc group on QoS on this proposal and, if received favourable, would welcome a proposal for a suitable date for such a joint meeting.

TS 22.05 and TR 22.25 are attached for information.
