

**Agenda Item:**

**Source:** Convenor (Yukio Hiramatsu, NTT)

**Title:** Terms of Reference for WG2 (Architecture)

**Document for:** Information

The following is the WG2 related part of the terms of reference for TSG-SA that has been agreed at the first TSG meetings in December 1998.

Definition, evolution and maintenance of the overall architecture including the assignment of functions to particular subsystems (e.g. UTRAN, CN, Terminal, USIM) and identification of key information flows.

In co-operation with the other TSGs, define required services, service capabilities and bearers capabilities offered by the different subsystems, including Quality of Service requirements for access to both packet and circuit switched networks.

In addition the Architecture Working Group will consider how to carry out the technical co-ordination and overview role with the other 3GPP TSGs
