**Title: Liaison statement on the modified lengths of parameters  
AUTN and AUTS**

CN4 noticed, serendipitously, that TSG SA approved CR 33.103-009, which modifies the AUTN and AUTS parameter lengths from variable to fixed. This change has an impact on TS 29.002, which has been properly addressed in CR 29.002-151.

CN1 are kindly asked to review the above mentioned CR against TS 33.103, to see if there is a similar impact on TS 24.008
