1. Overall Description:

SA1 thank SA3 for their LS (Tdoc S3-01400, S1-010737) on IMS security and UE functionality split. SA1 notes from the LS that the issue of UE functionality split was not dealt with at the recently held SA3, and is pleased to note that the issue will be a permanent agenda item for future SA3 meetings.

2. Actions:

The proposal from SA3 to have IMS security functionality in the proposed ISIM is not completely clear to SA1. SA1 would like to have more information about the following:

- 1) the proposed security architecture and which information is to be stored in the ISIM versus the USIM.
- 2) in the case 3 mentioned in the LS, SA1 is particularly interested to hear more detail about the scenarios envisaged and whether there is to be any information passed or shared between the ISIM and USIM.

3. Date of Next SA1 Meetings:
