>As a result, there are numerous things to report:
>
>1) 33.900
>A new version of 33.900 is attached kindly formatted by Maurice. We were
>not sure of the status of it, but it needs to be submitted to SA for
>approval and put under change control.
>
>2) SG GSM Association
>Last meeting took place in September with the Fraud Forum in September.
>Items improved were
>SG07, the risks document
>GPRS threats
>The accreditation scheme is being rolled out to AuCs and the GRX (GPRS
>backbone network).
>Stuart Ward may be able to update on these if he is going?
>
>On the A5/3 front, discussions between ETSI and GSMA are still taking
>place. The delay is getting some of the 3GPP partners to decide on
>ownership and funding issues. I'm told they are close to resolution....
>
>These is also a liaison statement about the clarification for the services
>required for follow me etc, and comment on the fraud threat. I think we
>have now sorted this out, and will put text in SG07 and 33.900.
>
>3) UCI
>Scott Cadzow suggested that 33.900 look at the issue of User
>Identification (the UCI) and the potential security issues. This refers to
>ETSI EG201 795 from the Human Factors Group. I'm happy to pursue this as
>it could go into 33.900.
>
>I think that wraps it up. Best wishes to you all.
>Cheers
