Thanks for our contribution: S3LI02\_024 ( TC Sec LI; Tdoc 32TD006)

As SA 3 LI already provided the chapters for GPRS/UMTS IP interception to ES 201 671 we recommend to use this principles as basic for the general requirements/implementation of IP interception.

SA 3 LI isn't expecting any new requirements for GPRS/UMTS (including IMS Rel.5) out of this WI.
