SA3 thanks CN4 for their response LS in N4-020302 on Trace and Availability of IMSI and IMEI. CN4 question to SA3 was:

- *CN4 would like guidance from SA3 on security implications on spreading sensitive information like IMSI/IMEI over the signalling interfaces due to support trace functionality.*

SA3 would like to inform all addressed groups that SA3 considered that the channels that the IMSI/IMEI would be transmitted over are already protected in the specifications, and therefore cause no security concerns.

Date of Next SA3 Meetings:

SA3#23	14 - 17 May 2002	Victoria, Canada
SA3#24	9 - 12 July 2002	Helsinki, Finland
SA3#25	8 - 11 October 2002	Munich, Germany
