1. Overall Description:

TSG GERAN would like to thank SA3 for their input on potential security upgrades for GERAN. TSG GERAN understands that this is not yet SA3's official position and therefore TSG GERAN awaits further input from the SA3#25 meeting in October.

TSG GERAN #11 has reduced the scope of the feasibility study to cover only conversational service provision over the Gb interface and has started the work on streaming. TSG GERAN assumes that for streaming and conversational service provision over enhanced Gb there is no inherent need to enhance security.

2. Actions:

To SA3

ACTION: TSG GERAN would like to ask TSG SA3 whether there is a plan to create work items to enhance GERAN security for A/Gb mode. If this is the case, the structure of the Work Items (i.e. Features, Building Blocks, Work Tasks) should be indicated.

3. Date of Next TSG GERAN Meeting:

GERAN #12	18-22 November 2002	Sophia Antipolis	France
