1. Overall Description:

SA2 thanks SA3 and CN1 for their liaison statements on Security and Security Solutions for the Ut Reference Point. Note that Mt reference point has been renamed as Ut reference point in the latest version of SA2 specifications.

There was full consensus in SA2 that the security solution for the Ut reference point is within SA3 responsibility and that SA3 should take the necessary decisions, taking into account the guidance received from CN1, SA1, and SA2.

There was less consensus concerning the questions asked by SA3. The same pros and cons emerged that have already been documented in SA3's meeting report.

SA2 also discussed CN1's answer and agreed with the conclusions in principle.

2. Actions:

none

3. Date of Next SA2 Meetings:

SA2#34	18-22 August 2003	Brussels, Belgium
SA2#35	27-31 October 2003	Asia
