

**3GPP TSG SA WG3 #30**

**S3-030753**

**18-21 November 2003**

**Munich, Germany**

**Agenda Item:** 6.x/6.x GERAN network access security/UTRAN network access security

**Source:** Ericsson

**Title:** CR's on "Handling of key sets at inter-system change"

**Document for:** Discussion and decision

---

---

## 1. Introduction

At SA3#30 Ericsson presented change requests in Tdoc S3-030625 and S3-030626 to TS 33.102 for REL-5 and REL-6, on "Handling of key sets at inter-system change". These change requests were approved by SA3. It was noted in the cover sheets that RAN2 had already agreed a CR in Tdoc R2-031856. TS 24.008 was also seen to be impacted by these CR's to TS 33.102.

After the SA3 #30 meeting it has been discovered that the MSC and BSC might not be able to fulfil these requirements in all use cases. Therefore Ericsson believes that a further analyse is required within several 3GPP groups before any stage 2 requirements can be agreed. Ericsson would therefore like to withdraw Tdoc S3-030625 and S3-030626 from SA3, and block these CR's from being forwarded to the next SA plenary in December 2003.

After an analyse has been made in impacted RAN, GERAN and CN- groups, a whole package of CR's should go together with a potential stage 2 CR to TS 33.102 to the appropriate plenary meetings.

---

## 2. Proposals

Ericsson proposes to withdraw documents S3-030625 and S3-030626 from SA3, and that these documents are not forwarded to the next SA plenary in December 2003.
