**1. Overall Description:**

T3 thanks SA3 for their Response LS in T3-030942 (S3-030660) regarding potential USIM impact of the MBMS security framework.

T3 confirms to SA3 that the requirement so far received can indeed be implemented on the USIM for release 6. Potential solution has been reviewed by T3 (T3-040060, T3-040061) and can be easily updated depending on the received requirements from SA3.

T3 will inform SA3 on the proposed CRs to its specification as soon as SA3 confirm their requirements on the subject.

**2. Actions:**

**To 3GPP SA WG3:**

T3 kindly ask SA3 to provide the final requirements for MBMS management onto the USIM and welcome further cooperation on these matters.
