Subject: TTPCom nomination of Lars Brenk as Vice-Chairman of T2

Dear T2 colleagues,

TTPCom Ltd would like to nominate Mr. Lars Brenk, TTPCom, as a candidate for the vacancy of the Vice-Chairman of 3GPP TSG-T WG2. As one of the leading independent supplier of technology for digital wireless communications in the world, TTPCom is willing to take on the responsibility to contribute to the continues success of 3GPP.

Whenever possible, leadership should be selected from participants who have demonstrated dedication to the work going on within the group. When working in Bosch/Siemens, Lars Brenk has been fully committed to the activities of T2 and intends to continue from within TTPCom.

I am sure that Lars Brenk will be an ideal candidate for the position as he has been in the business for many years and as he has participated actively in the standardisation for some years now. You find attached his CV.

TTPCom is fully able and committed to providing the necessary resources to enable Lars Brenk to fulfil the duties and obligations of the T2 Vice-Chairman.

Best Regards

Morten Iversen
Head of TTPCom Danmark

CV of Lars Brenk

Lars Brenk has many years of experience in telecommunication, and worked 5 years in the research and development department for Dancall/Bosch/Siemens as a software engineer, specialising in MMI design and software implementation for mobile phones, with the main emphasis on network registration and handset security.

Lars joined TTPCom in 2001 and will continue this work as the driving force in the secure download group.

Lars holds a Master of Science in Decision Support Systems from Aalborg University, 1993.

Lars started his standardisation work by attending the two ETSI SMG workshops on Applications and Automatic Execution 1998-99, and has attended all the 3GPP TSG-T WG2 meetings and almost all the ad-hoc MExE meetings since January 1999.

Lars has been the representative for Bosch/Siemens in the T2-SWG1 MExE group, and has been actively involved in finishing the 23.057 MExE specification releases 98, 99, release 4 and is now working with release 5.
