Title: Emergency Call Enhancements for IP & PS Based Calls – Stage 3
Agenda item: 8.6
Document for: INFORMATION and APPROVAL

Work Item Description

Title:

Emergency Call Enhancements for IP& PS Based Calls – stage 3

1 3GPP Work Area

	Radio Access
X	Core Network
	Services

2 Linked work items

(~~320451652~~) PS domain and IMS-CN-subsystem impacts for supporting IMS eE emergency calls

3 Justification

It shall be possible to establish an emergency call by IMS via-over the PS domain. Emergency calls will be routed to the emergency services in accordance with national regulations. This may be based upon one or more default numbers stored in the ME and/or USIM. It shall be allowed to establish an IMS-PS emergency call-session without the need to dial a dedicated number to avoid the mis-connection in roaming case, such as menu, or by automatic activation a linkage to a car air-bag control. This functionality shall be supported by the UE without a SIM/USIM being present. No other type of calls than E emergency calls shall be accepted without a SIM/USIM.

4 Objective

The objective of this WI is to study the functionalities required on the protocol level to meet the requirements as defined in TS 22.101, 23.060, 23.228 and other relevant specifications for emergency call handling in [the IM CN Subsystem and in](#) the PS domain.

5 Service Aspects

As defined in TS 22.101 and other relevant specifications to include but not limited to:

The main focus is on:

- Support for SIP emergency calls [in the IM CN Subsystem](#) and related packet bearers

Points to be considered, too:

- Using the existing emergency numbering schemes
- Compliant with FCC mandates, European and other regulatory requirements
- Possibility to initiate emergency calls to different emergency call centers, depending on the type of emergency
- The function shall be supported when roaming

6 MMI-Aspects

As defined in TS 22.101 and other relevant specifications, it shall be possible to implement different MMIs to invoke emergency services. This can be for example the dialled number, a dedicated Menu, one or more dedicated buttons, etc.

7 Charging Aspects

None.

In accordance to 22.101, no impacts on charging are foreseen.

8 Security Aspects

To be determined.

Expected Output and Time scale (to be updated at each plenary)

New specifications						
Spec No.	Title	Prime rsp. WG	2ndary rsp. WG(s)	Presented for information at plenary#	Approved at plenary#	Comments
Affected existing specifications						
Spec No.	CR	Subject			Approved at plenary#	Comments
24.008		PS based emergency calls			TSG#22 Dec. 2003	CN1 resp. Generic-e Changes to RIL-3 due to emergency calls for the PS domain
24.228		Emergency calls for IMS			TSG#22 Dec. 2003	CN1 resp. Changes to IMS due to the availability of a PS bearer for emergency calls
24.229		Emergency calls for IMS			TSG#22 Dec. 2003	CN1 resp. Changes to IMS due to the availability of a PS bearer for emergency calls
29.061		PS based emergency calls			TSG#22 Dec. 2003	CN3 resp. Generic-e Changes to the interworking between PLMN and PDNs due to emergency calls for the PS domain
29.163		PS based emergency calls			TSG#22 Dec. 2003	CN3 resp. Additions to the IW due to emergency calls.
29.060		PS based emergency calls			TSG#22 Dec. 2003	CN4 resp. It is FFS whether this spec is affected. Generic-e Changes to GTP due to emergency calls for the PS domain
