

Agenda Item: 5.3.3

Source: T3

Title: Updated WID: "Test specificatio for TS 23.048 Rel-5"

Document for: approval

Introduction:

The work item description is updated to reflect the new target date for approval, specification number and the rapporteur. Changes are shown with revision marks.

Work Item Description

Title

Test Specification for the Security Mechanisms for the (U)SIM application toolkit REL-5.

1 3GPP Work Area

Terminals WG3 (USIM)

2 Linked work items

None

3 Justification

Having a test specification for "Security Mechanisms for the USAT" specification would ensure service interoperability between smart cards.

4 Objective

The objective is to deliver tests for the REL-5 specification.

The test specification should be focused and implemented for TS 43.019 and Open Platform compliant cards in a first step, then extended to all types of card.

Since it is not the aim to test the Open Platform specification, only the specific behaviour of those Open Platform commands described in TS 23.048 may be included in the scope of the test specification.

The test specification should be structured in a way that the REL-4 tests can be identified and run separately.

5 Service Aspects

None.

6 MMI-Aspects

None.

7 Charging Aspects

None.

8 Security Aspects

None.

9 Impacts

Affects :	USIM	ME	AN	CN	Others
Yes	X				
No		X	X	X	X
Don't know					

10 Expected Output and Time scale (to be updated at each plenary)

New specifications						
Spec No.	Title	Prime resp. WG	2ndary resp. WG(s)	Presented for information at plenary#	Approved at plenary#	Comments
xx-xxx 31.0 48	Security Mechanisms for USAT - Test specification	T3		T#2523	T#2624	
Affected existing specifications						
Spec No.	CR	Subject		Approved at plenary#	Comments	

11 Work item rapporteurs

~~Sophie Viallet~~ [Jean-François RUBON](#) - Gemplus

12 Work item leadership

T3
