# CN Management Report

Prepared for PCG#5

November 14, 2000

# Hot Topics (Technical)

- MSC->MSC Server/MGW Split (CN4)
  - Stage 2 work progressing (TS 23.205)
  - CN4 will specify H.248 packages for split (TS 29.232)
- TrFO (TrFO Workshop)
  - Agreed on the use of the Iu UP within CS Network
  - Support of IWF at edge to complement Transcoder at edge
  - Symmetrical RFCI type per Codec type
  - RCFI indication at TrFO break is progressing
- SIP (N1)
  - SIP AdHoc created (joint SA2/CN1 experts)
  - SA2 responsible for TS 23.228 (High level flows)
  - CN1 responsible for TS 24.228 (Detailed flows & Stage 3)
- Hexadecimal IMEI (CN1/CN4)
  - On hold awaiting results of GSMA TWG study

# Hot Topics (Technical, cont.)

- CAMEL Phase 4
  - Called Party Handling work proceeding
  - Optimum routeing
  - MT SMS
  - CAMEL for IMS still controversial
- OSA
  - Alignment between OSA and Parlay 2.1

# Work Item Status

- New Work Items (Approved)
  - SIP CC (NP-000568)
  - Interworking between IM CN Subsystem and CS Networks (NP-000465)
  - Bearer Independent CS CN (NP-000538)
  - OoBTC (NP-000529)
- Work Items Postponed or Rejected
  - Interworking between IM CN Subsystem and IP Networks
  - Combined MAP Signalling for Mobility Mgmt
  - IWF at the CN Border

# Hot Topics (Administrative)

- Work Planning Principles
    - Decoupling of releases from yearly cycle
    - Stage 2 & 3 of IMS included in same release
    - No priority or preference of Rel4 over Rel5
- Revision tracking needed for the project plan
    - So only changes need be reviewed
    - To identify source of changes
    - To ensure that all requested changes have been applied
- Improved correction categorization in working methods
    - New F category for ambiguity resolution (NP-000548)
- Criteria agreed for accepting corrections to frozen releases
    - Essential corrrection: frequent error with significant consequences
    - Correcting an incorrectly implemented previous CR
    - CR supported by meeting consensus
- No editorial corrections to frozen releases (R99 or earlier)

ICSSON

# CN Organization for IM Subsystem Work

- Allocation of IM work to WGs by protocol
  - CN1: SIP (Call control) including SIP supplementary services, SDP (Session Definition Protocol)
  - CN2: CAMEL extensions for VoIP and multimediaCN3: QoS protocols (such as RSVP), RTP (CRPT should probably be in RAN3).
  - CN4: Name to Address translation functions, AAA protocols, security protocols, subscriber data management in HSS and the HSS to CSCF protocols to support this.
  - CN5: extension of OSA to VoIP and multimedia
- Joint CN meetings during first half of 2001.

3GPP

# New Officers/MCC

- Hiroshi Nakamura -> CN Vice-Chair
- Yun-Chao Hu -> ITU-T Coord Ad-Hoc Convenor
- Per Johan Jorgensen -> CN2/CN5 Secretary
- Kimmo Kymalainen -> CN4 Secretary

- Upcoming vacancy -> CN1 Secretary
