# SA Release Stability

CR Statistics from SA#29

A GLOBAL INITIATIVE

## Release 6 Status

- **Rel 6 Functionally Frozen and Stable**
- **Still a significant number of corrective CRs**
- **Alignment CRs still occurring**
- **Recent Completions:**
  - Domain Specific Access Control
  - IWLAN Charging
  - PS Handover
- **Still Outstanding**
  - TR on MBMS user service guidelines
- **Requested late Rel 6 additions being handled as “Early Implementation Rel 7” packages**

A GLOBAL INITIATIVE

## Release 7 Status

- **Stage 1 Mostly Frozen**
- **Some Exceptions Permitted**
- **Stage 2 freezing expected March 2006**
- **Stage 3 freezing expected September 2006**
- **Some items (SAE, O&M completing later than Sept 2006)**
- **TISPAN may require some specs be made™ available early**

PCG#15\_08

Agenda item: 4.1

## Recent Controversial Issues

- **Interoperability Testing (IOT)**
  - Study using a trial case planned
  - Workshop planned Dec 08, 2005
- **Use of 2G SIMs for GBA**
  - Principle confirmed of phasing out SIMS
  - 2G SIM usage granted as an exception to the principle
- **SA2 resource/time allocation**
  - SA2 on critical path of almost all features
  - As system complexity grows, this problem increases
  - Little SAE progress so far (Companies not compromising!)
