## **1 Introduction**

This document provides the changes made to the 3GPP Work Programme since PCG#10 and is presented here for PCG approval.

## **2 3GPP Work Plan**

### **2.1 Additions**

The term "feature" is defined (3GPP TR 21.900) as "new or substantially enhanced functionality which represents added value to the existing system" and is intended to be a description of commercial rather than technical significance. (The so-called "building blocks" and "work tasks" below the feature should be defined in technical terms in order that detailed work planning and tracking can take place. The full 3GPP Project Plan is always available from the [3GPP web site](http://www.3gpp.org).)

Table 1 lists the new features that have been added to the Work Programme since PCG#10 together with a reference to the documents containing their latest TSG-approved descriptions. For convenience, these are grouped together in a single directory on the 3GPP site:

### **2.2 Deletions**

Table 2 lists those features that have been deleted from the Work Programme during this period.

## **3 Decision required**

The PCG is invited to approve the addition and deletion of the features given in Table 1 and Table 2 and, by that act, approve the current 3GPP Work Programme.
