Agenda	Agenda Item Title	Tdoc	Document Title	Source	Notes
		CP-050059	CRs on Rel-5 WI "IMS-CCR" for TSs 24.229 and 24.228	CT1	C1-050777 in this doc and C1-050717 in CP-050061 are overlapping C1-050777 in CP-050059 and C1-050717 in CP-050061 merged into CP-050215 Revised to CP-050213 The only Rel-5 CRs from CT1 to this meeting are in the IMS CR pack CP-050059. This CR pack corrects the handling of Reg-Await-Auth timer, security association at P-CSCF, use of default port, Authorization header, handling of error cases both at P-CSCF and I-CSCF, implicitly registered public user identities and registration procedures at I-CSCF. There are three CRs with no mirror CR in this pack. Justification of 24.228 CR as an essential correction may be debatable, but at least formally the TS is normative, and therefore the CR was agreed as an essential one. In case of CT1 CR C1-050685 and C1-050780 the Rel-6 requirements already differ from Rel-5, so therefore no Rel-6 mirror CR is needed.

		CP-050063	CRs on Rel-6 WI "PRESNC" for TS 24.141	CT1	Approved The presence CRs in CP-050063 update several references and correct the terminology in Service Point Trigger, as the old SPI is not defined. The title of C1-050690 did raise some discussion on the justification for the change. The name describes the nature of the straightforward changes quite well and as some of the changes do affect the message syntax it was considered that category F is appropriate.

		CP-050068	CRs to Rel-6 WI "TEI6" for TS 23.122 and 24.011	CT1	Approved TEI-6 CRs from CT1 are presented for approval in several CR packs. CP-050068 is on the PLMN selection. 		CP-050069	CR to Rel-6 WI "TEI6" for TS 24.008	CT1	Approved Most 24.008 CRs have been collected in CR pack CP-050069. These include clarification of the handling of shifted IEs where no checking of comprehension required information elements is performed, allow the UE to perform RAU to re-negotiate its configuration, GERAN requested extension of high multislot classes, correction to numbering of some figures, handling of the duplicated RAU requests due to retransmissions, allowing the lower layers to trigger cell update, correction to former CN1 CR on the use of code point 'no identity' in mobile identity and discontinuing the use of the code point GPRS attach while IMSI attached in attach type IE.
		CP-050070	CR to Rel-6 WI "TEI6" for TS 24.008	CT1	Revised to CP-050207 before presentation CR pack CP-050070 is split to standalone document as this CR on service based handover request is related with exchange of liaisons between different working groups. No formal linkage to any other CR was defined in the CT1 meeting, but it is expected that other related CRs will be submitted to the same plenary from the other CT working groups.
		CP-050207	CR to Rel-6 WI "TEI6" for TS 24.008	CT1	Return Revision of CP-050070
		CP-050071	CR to Rel-6 WI "TEI6" for TSs 24.008 and 23.009 (SCUDIF related CRs)	CT1	Approved All SCUDIF related CRs are contained in CP-050071. There is no Rel-6 work item for SCUDIF, so TEI-6 was used instead for these CRs which add the network initiated service upgrade of SCUDIF call. There is no formal list of dependencies between the SCUDIF related CRs but they were requested to be handled together in the plenary. The 23.009 CR contained in this CR pack was endorsed by CT4 during the WG meeting week.
