Title: Terms-of-Reference for TSG-N WG2

TERMS OF REFERENCE for TSG-N WG2

These terms of reference are intended to define at a high level the responsibility of TSG-CN WG2 (known as N2) as a subset of the responsibilities of TSG-CN.

~~The TSG-N WG2~~ N2 is responsible for the specifications of signalling for Core Network internal interfaces.

More specifically, ~~TSG-N WG2~~ N2 will address the following areas of work:

- Core network signalling between the core network nodes to support functionality such as user information, subscription information and control of network services,
- Signalling for Interworking with ~~2nd -generation networks, initially GSM~~ network (e.g. handover and roaming),
- Development and evolution of core network protocol for the support of packet and multi-media services
- Core network O&M requirements.
