Source:	**TSG-CN Chairman**
Title:	**Bundle 2 RFC numbers from IETF**
Agenda item:	**4.3**
Document for:	**Information**

The following RFC numbers have been allocated by the RFC editors. All of these
specifications have been approved and are proposed standards track documents.
Please Note that this is just an early release of the numbers done for the 3GPP.
RFC publication will follow at normal pace, so actual use of the documents should
continue to be through the i-ds, however note the i-ds may not be updated and the
texts are frozen.

Please do not desiminate these outside of the 3GPP as the RFC editors do not want
requests for these RFCs until they are ready.

These drafts are part of the bundle 2 package. No bundle 3 or 4 deliverables are
ready yet.

```
    3309
  o SCTP Checksum Change
        <draft-ietf-tsvwg-sctpcsum-07.txt>

    3310
  o HTTP Digest Authentication Using AKA
      <draft-ietf-sip-digest-aka-03.txt>

    3311
  o The Session Initiation Protocol UPDATE Method
        <draft-ietf-sip-update-02.txt>

    3312
  o Integration of Resource Management and SIP
        <draft-ietf-sip-manyfolks-resource-07.txt>

   3313
 o Private SIP Extensions for Media Authorization
   (with requested addition of the word "Private" to title)
        <draft-ietf-sip-call-auth-06.txt>

   3314
 o Recommendations for IPv6 in 3GPP Standards
        <draft-ietf-ipv6-3gpp-recommend-02.txt>
```

The references in 3GPP specfications should be updated accordingly.
